### **Equities suffer** sharp fall amid \$, rates worries BY SIMON HOLBERTON IN LONDON

AND JANET BUSH IN NEW YORK

SHARE PRICES in London and slumped from the opening bell in New York fell sharply yesterday response to the dollar's fall over-New York fell sharply yesterday as it became apparent that the recent stock market rally had not restored investor confidence. In a mirror-image of the stock restored investor confidence. There were also continuing concerns over the world economic as the losses in equities steep-outlook.

The FT-SE 100 Share Index closed 49.5 points down at 1,782.7 in what was the market's worst day since February 8, and the FT Ordinary Share Index closed 38.2 lower at 1,421.6. On Wall Street the Dow Jones Industrial Average dropped 30 points in the first half hour of trading, and closed

43.77 down at 2,023.87. The falls in London and New York followed a 113.95 point decline in share prices in Tokyo where the Nikkei Index closed 0.44 per cent lower at 25,781.28. These were mirrored in Europe, where share prices in Amster-dam, Frankfurt and Paris were

all lower on the day. Dealers and analysts said yes-terday's sharp decline in London and New York underlined the continued weakness and fragility of world equity markets in the wake of the stock market crash in October and November last year. The welkness of the dollar and concernsover the outlook for the US economy and US interest rate policy also appear to have

unnerved investors.

Another view was that the announcement by Lucas Indus-tries of a \$162.7m (\$298.2m) onefor-four rights issue had encouraged selling because investors were worried there might be more such issues to come. Analysts said the strength of sterling and concerns over today's UK trade figures were

also possible reasons for the mar-ket's sharp fall.

**YOU HAVE A VIEW**

### Brussels tackles French over Les Echos sale

BY WILLIAM DAWKINS IN BRUSSELS

THE EUROPEAN Commission is asking the French Government to explain its decision to delay the purchase of Les Echos, the financial daily newspaper, by Pearson, the UK publishing group which owns the Financial

Lord Cockfield, the Commissioner responsible for the inter-nal market, has written to Mr Edouard Balladur, the French Finance Minister, warning that EC law forbids attempts to stop Community companies from ing business in other member states. The letter could be the opening step in a legal action by the Brussels authorities against

the Paris Government. If Mr Balladur does not satisfy the Commission that he is acting within EC law, Brussels can then ask for a formal justification from Paris, following which it can issue a so-called "reasoned opinion," demanding that the French authorities fall in line with the Treaty of Rome by letwith the Treaty of Rome by let-ting the bid go ahead. Failure to do so would then lead to a battle in the European Court of Justice,

the top legal power in the EC. It is understood that Commis-sion officials felt there were grounds to start a legal action immediately, but that Lord Cock-field wanted to give the French Government a chance to put its case first. Any justification for delaying the bid by Pearson hinges on the extent to which the group can be called an EC com-- and therefore can claim the freedoms allowed in the Rome Treaty.
Mr Rupert Murdoch, the US-

Anstralian publisher, owns 20.5 per cent of the group, a stake which EC officials do not believe should jeopardise Pearson's status as a Community company. However, Mr Balladur questions whether Pearson's EC status is "durably established" and the Commission itself is unsure how the UK group's legal position might be changed by any further moves from Mr Murdoch French officials yesterday emphasised that their Government was undecided on the bid for Les Echos until it felt Mr

DM3.95bn compared with DM3.82bn in 1996 and DM2.9bn in 1996. Total subsidies were DM18.7bn, of which DM9.4bn was included in calculating the deficit. The rest was mostly to help finance investments, running at nearly DM6bn annually.

matically solve its problems, said Mr Lothar Dernbach, the planning director, it would help management act more flexibly and competitively and help prepare the Bundesbahn for stiffer competition from road transport as this is dere-gulated in line with the EC's progress towards an internal

many's federal railway system rose sharply last year to nearly DM4on (£1.3bn) and are expected to remain around this level

The Bundeshahn's deficit is

now almost back to where it was six years ago, before a period of steady reductions. It has been engaged on an aggressive cost and labour-cutting programme (the labour force totals 257,000 against 314,000 in 1982) while also investing heavily in new track, trains and equipment.

The loss for 1987 totalled DM3.95bn compared with

As well as striving to become more efficient and win new passenger and freight business, the Bundesbahn wants the Government to make its finances more transparent by separating the costs of infra-structure (such as track) and of the railways' social role from the commercial side where it competes for freight with road, rail, and canals.

While this would not auto-

#### Greens try to get their act together

By David Goodhart in Bonn

THE OLD riddle of whether the world's most successful ecology party is a real political party or a "movement" is unlikely to be solved at this weekend's 10th congress of West Germany's Green Party.

However, elections for the party executive, and the outcome of an obscure debate on setting up a research foundation mod-elled on those of the establishment parties, ought to provide clues as to whether it is finally

going straight.
This is of more than academic interest. Although the Greens have suffered setbacks since touching their electoral peak of 8.4 per cent of the national vote in the 1984 European elections, in the 1984 European elections, they are refusing to wither away. Many observers believed that having successfully "greened" the other parties and then split into three warring camps — "realos", "neutralos" and "fundis" — incapable of agreeing on anything beyond basic ecological questions, the Green vote would collapse. In fact, the Greens polled 8.2 per cent of the vote in the 1987 national election and

the 1987 national election and slipped only slightly in the recent state election in Baden-Württem-Despite this staying power the Greens palpably lack direction. The realos, who dominate the 43-strong parliamentary group, and the fundis, who control the party executive and claim most of the activists, could not survive with-

activists, could not survive windout each other (they would not clear the 5 per cent hurdle for parliamentary representation) but cannot function effectively while tied together.

What is more, the "strategies" of both groups are in a mess. The fundis have the most utopian ideas but probably the more realideas but probably the more realistic strategy; which is to admit the party cannot increase its elec-toral appeal much further and should therefore concentrate on being an effective radical pres-sure group. However, the fundis self-confidence has been damaged

by the Greens' poor showing in the last city election in Hamburg - a fundi base.
None the less, the fundis at least have the ability to turn their assumption of electoral failure into a self-fulfilling prophecy by behaving in ways calculated by behaving in ways calculated to alienate ordinary West Germans. The pragmatic realos, some of whom optimistically believe in an electoral ceiling of up 20 per cent, can only wring their hands and get on with trying to water down old Green policies like opposition to Nato. However the reales own strat.

However, the realos own strat-egy of slipping into power under the wing of the Social Democratic party was undermined by last year's elections in Hesse where the SPD suffered a sharp fall in its vote after going into the elec-tion advocating a tie-up with the Greens. The SPD has also now turned its attention to local coalition agreements with the other small party, the Free Democrats. All is not lost, however. If the Greens can continue to hold on to their existing vote, and perhaps push it up with some more realo polish, the chance of post-election deals with the SPD, at local and state level, cannot be

learn some old-fashioned political sophistication, for example by trading votes and official posts with the right-wing Christian Social Union in the Munich city government. And the widespread view that the Greens are a generational phenomenon who have failed to capture the imagination of younger Germans may have been overdone. According to one political scientist, 85 per cent of all Green votes come from the all Green votes come from the 18-29 age group.

THE CEASEFIRE is likely to open a substantial political space for the Contras inside the Nicaraguan political system, changing the complexion of political debate

considerably.

The Sandinistas enjoy tremen-The Sandinistas enjoy tremen-under a right-wing umbrella dous political control and the group, known as the Coordinainternal opposition is fragmented and weak, but the Contras could inject life into a political debate over the nature of Nicaraguan society that seemed irrelevant in the midst of the seven-year-old fratricidal war.

Beyond the immediate aim of establishing a 60-day ceasefire, the agreement should transform the Contras' armed opposition into a civic one.

Once the Contras are concentrated inside designated ceasefire zones they will have acquired the right to send up to eight dele-gates to the so-called National Dialogue, a forum where the rul-ing Sandinistas and 11 of 14 opposition parties attempt to work out their differences, mostly over matters of principle.

So far, the National Dialogue has had an erratic life. The opposition parties have often boycot-ted it charging the Sandinistas with not being serious about making the necessary changes to render political debate in Nicara-

The dialogue was relaunched recently just as the latest round of peace talks were beginning. President Daniel Ortega presided over some sessions of the National Dialogue while his brother, General Humberto Ortega, headed the Sandinista delaration at the neare talks.

delegation at the peace talks and ideological divisions and involved with the peace talks said the timing was no coincidence: "We wanted them (the It will demonstrate just how Contras) to see that if they much popular support not only agreed to put down their weapons they could immediately enter but also what sort of electoral a meaningful political dialogue base the Contras have, having

### Washington stunned at positive turn on most divisive foreign issue

THE INITIAL reaction in Washington yesterday to the ceasefire was stanned silence, writes Lionel Bar-

Few officials had dared predict that the first-ever direct talks that the first-ever direct talks between the two warring parties on Nicaraguan soil could take such an apparently positive turn. What is so striking is the contrast between the flexibility shown in Sapoa, where the talks were held, and the inertia characterising Washington's policy towards Nicaragua.

It is hered to think of a foreign

It is hard to think of a foreign policy issue which has divided the US more deeply during the presidency of Mr Ronald Reagan than that of Nicaragua; the policy paralysis of the last six months is largely a result of those divisions.

In spite of the presence of the regional peace plan devised by Presi-dent Oscar Arias of Costa Rica, the Reagan Administration has stuck to the line it has pushed for the past seven years: that only a US-backed Contra guerrilla force can avert a communist beach-head in Nicaragua senting instability throughout the

region. Tala argument retains wide support in the US, in particular in the South, which is vulnerable to a refu-gee wave from Central America. However, the Contra America.

However, the Contra cause —
unlike that of the Afghan rebels —
has never captured the hearts of the
American people, nor the US Congress which has swung like a pendulum on the question of US military
aid. Many Democrats have voted for

ed \_\_\_\_\_

Contra aid to avoid being labelled soft on communism.

The Democrat victory in the 1986 mid-term elections, followed by the Iran-Contra arms scandal, itself a direct consequence of the bitterly partisan Nicaraguan policy, changed the nature of the game.

The scandal — revolving around a secret White House operation to trade arms to Iran in return for US hostages and to divert the proceeds.

hostages and to divert the proceeds to the Contras - crippled the Administration for at least nine

The most striking example is the role of the House Speaker, Mr Jim Wright of Texas, who has turned himself into a mini-Secretary of State. It was the Spanish-speaking

Mr Wright who, last August, inserted himself into the Central American peace talks to ensure that the Sandinistas came aboard.

the Sandinistas came aboard.
Since then, Mr Wright, helped by

Mr Ortigoza last Dece completed a 25-year sentence for the alleged murder of a police cadet in 1962, a charge he was forced to admit to under torture, and which his supporters say was used to silence him as an opponent of the dictatorial regime of General Alfredo Stroessner. At the time of his imprisonment Mr Ortigoza was a captain in the Paraguayan army.

He was released from prison last December, but has been under house arrest since then, yesterday's escape. The gov-erument has denied that Mr Ortigoza was under house

### IMF director's plan would lift debt weight

A NEW APPROACH towards providing a solution to the Third World debt crisis has been proposed by one of the International Monetary Fund's 22 executive

The plan, which calls for the establishment of a so-called Debt Adjustment Facility, ideally to be created under IMF auspices to take over developing country debt from commercial banks, has been developed by Mr Arjun Sen-

Although India's representa-tive on the board, Mr Sengupta is putting forward the proposal in a personal capacity. It does not have the support of the IMF. whose current position, as deter-mined by the industrialised countries and in particular the US, is to oppose an extension of its role

in the way the proposal suggests.

Mr Sengupta's plan, which
avoids some of the apparent pitfalls of earlier grand solutions, is predicated on the belief that there will be no solution unless some of the weight of debt is taken off the shoulders of the developing countries.

"Economic condi-tions... have altered so much from those prevailing in the late 1970s that a large part of the debt contracted at that time by these upon Alternatively, debtor coun-tries could set aside some countries is no longer service-

able," he says.

The role of the debt adjustment facility, or DAF, would be to negotiate with both creditor banks and the debtor country to establish two things; the amount of bank debt to be assumed by the facility and the discount to face value at which the debt

should be valued. The discount on the debt would be arrived at with reference to prices in the secondary market in Third World debt, but the market would not be the sole determi-

Banks would transfer the agreed amount of loans to the DAF, writing off the amount of the discount, but receiving in exchange bonds, with a maturity of 15 to 20 years and a face value equivalent to that agreed in nego-

discount to the debtor, convert it into new debt to the facility with a new repayment schedule. As support of the facility.

Steven Fidler on a proposal for a new Debt Adjustment Facility to assist developing countries

trade-off for the relief, the country would agree to follow an eco-nomic policy package, perhaps of three to four years' duration, as agreed by the IMF.

In case the country did not

meet interest or principal obliga-tions, the facility would take responsibility for it. Mr Sengupta suggests that this would be a contingent liability on the industrialised countries, which could be handled in the following way. Industrial nations could issue zero coupon bonds in case principal were not repeid, or could invest in annuities to collateralise interest payments of the debt countries. Only if the interest or principal payments were not met by the debtor countries would these funds be called

reserves to create annuities to collateralise interest. In this way, Mr Sengupta's plan would avoid the requirement for a huge capital injection to a debt-purchasing agency by western countries, which is a feature of other large spale solutions ture of other large-scale solutions such as Mr Robinson's.

Mr Sengupta says creditor banks may be more inclined to return to voluntary lending because their exposure to the countries would have fallen and the market value of their remain ing debt would have increased Flows of funds to the debtor countries would be further enhanced by lending from multilateral agencies such as the World Bank

# CARGO CUTS COSTS ALL ROUND.

When it comes to cutting costs, at 7-5 tonnes and below, the Non-HGV New Cargo leads the way.

ALL ROUND SAVINGS, ALL THE WAY. With the winning combination of outstanding value, low running costs and high resale price, the New Cargo gives you a miles better run for your money.

DISC BRAKES ALL ROUND. The New Cargo is the only British truck to have disc brakes all round. Smooth, powerful and progressive, it has the braking system of a truck with the braking characteristics

expected by car drivers, laden or unladen. The introduction of disc brakes has cut total servicing costs by 24% over 120 000 kms. An impressive figure that includes a saving of 60% on the overall cost of brake relines. And, of course, disc pad life can be double that of

MORE PERFORMANCE, MORE **COMFORT.** Rockwell rear axles permit a wider choice of 'faster' ratios, enhancing New Cargo's speed and cutting down journey times.

Now, with the option of a 5-speed overdrive gearbox, fuel economy is better, noise level is lower and engine life is longer.

And with parabolic springs front and rear, New Cargo always provides a more comfortable, supple ride.

UNBEATABLE FUEL ECONOMY. The bestselling Cargo 0811 holds Commercial Motor's 7-5 tonne fuel economy record for 6-cylinder vehicles with 17-1 mpg.

A BETTER CAB ALL ROUND. Its aerodynamic exterior and quiet, comfortable interior, creates an exceptional driving environment for the New Cargo.

The comments in the January 1988 'Headlight' road test were illuminating, 'Access into and across the large, spacious cab is no problem; all-round visibility, including upwards, is excellent."

COST CUTTING OPERATOR CARE. A second year unlimited mileage warranty on all major powertrain components comes free and in addition to the unlimited mileage first year warranty. Cost Care offers you a choice of tailor-made, fixed

price maintenance contracts. And every New Cargo has behind it the biggest truck specialist dealer network in Britain.

THE BEST EVER. The thousands of operators who have bought many more thousands of Non-HGV Cargos have made them Britain's best-selling 7.5 tonners by far. Built by Britain's biggest producer and biggest exporter of trucks at the most advanced and productive truck plant in Britain, the New Cargo is the best Cargo ever.

From the day you buy your New Cargo, to the day you trade it in for another, the New Cargo cuts costs, making you better off all round.

TEST DRIVE THE NEW CARGO. Many of the benefits you'll find on the 7-5 tonne New Cargo you'll

also find on the new 9 to 15 tonners.

For free brochures, 01-200 0200 ring anytime and ask for "NEW CARGO".

#### India puts its faith in Sikh high priests to curb Punjab violence John Elliott talks to

THE INDIAN Government is adopting a carrot and stick approach in a fresh attempt to m growing Sikh violence in the troubled northern state of Punjab. After years of seemingly insoluble conflict ministers are now planning to tighten security along Pubjab's borders with Pakistan to try to Pakistan to try to curb gun smug-ging, while hoping that militant High Priests recently released ple in Amritsar, are no longer from jail will act to reduce the used as sanctuaries for the

number of killings Yesterday saw another 10 killings, including a Hindu priest, bringing the toll in the Punjab to more than 400 so far in a year which has seen a sharp escala-tion of violence culminating this week in rocket launchers being used for the first time by Sikh

extremisis.

Mr P Chidambaram, Minister of State for Home Affairs and a confidence of Mr Rajiv Gandhi, Prime Minister, said in an interview yesterday the central government was showing flexibility and firmness. "We are taking a calculated risk that our moves will create a climate in which the will create a climate in which the high priests can bring some influ-ence to bear on the extremists,"

India's Home Minister about his high risk strategy to curb the killing

used as sanctuaries for the extremists. If they did this then a new climate could develop."

Mr Chidambaram admitted the five priests had not given any pledges to the government before ministers took a controversial decision early this month to release them from prison, along with 40 other Sikh extremists, in an attempt to break the cycle of

At the same time the govern-ment demonstrated its frustration with moderate Sikh politi-cians by dissolving their previously-suspended Punjab State assembly, which opens the way for the militants to come to power later. Mr Chidamharam rejected criti-

cisms voiced in India that the government should not have abandoned moderate leaders in "We hope that the priests will abandoned moderate leaders in the old Punjab state assembly in terrorist killings of innocent people. We also hope the priests will so-called moderates have run

the militants, then being a mod-erate is of no consequence."

The priests have so far responded to the government ini-tiatives by starting talks with extremist groups and by refrain-ing from using the Sikh indepen-

dence slogan of Khalistan. The government has also brengthened its security noward ties which say it contains draconian emergency measures. The bill contains enabling powers for a state of emergency in the Pun-jah. It also allows for presidents's rule, that is the direct rule from Delhi which has operated in Pun-jab since last May, to continue

for three years. There are no immediate plans to introduce a state of emergency but this could be done, either in all or part of the state. First however the government is preparing a plan for new administrative regulations and security operations along the border with Pakistan, which has traditionally been a centre for extremists. Mr Chidamberam said this was "our most vulnerable area".

A Foreign Ministry spokesman yesterday said that the Pakistan Government "facilitates the supply of arms to the militants and is responsible for motivating and training the militants and for ensure that gurdwarss (Sikh tem-away from the battle. If you run training the militants a ples), including the Golden Tem-away and have no infinence over inciting them to violence.

#### Kenya Vice **President** demoted

KENYAN President Daniel arap Moi demoted Vice President Mwai Kibaki and appointed Deputy Science and Technology Minister Josephat Karanja to take his place in a cabinet reshuffle, Reuter reports from Nairobi. Voice of Kenya radio yesterday

in a bill passed by Parliament on Wednesday night, despite strong Mol came to power, was demoted objections from opposition parto Minister of Health. Moi's decision followed rumours of a rift between the two men.

Protocol signed

THE Soviet Union and the Philippines yesterday agreed to annual political consultations. Reuter reports from Manila.

The agreement was announced during a meeting between For-eign Secretary Raul Manglapus and Soviet Deputy Foreign Minis-ter Igor Rogachev. Mr Manglapus and Mr Rogachev signed a two-page pro-tocol calling for annual consulta40°

tions alternately in Manila and Moscow. The talks will include bilateral and international issues,

with the agenda and level to be determined during consultations.

Kinross acquittals Seven officials from South Africa's Kinross gold mine, where 177 lives were lost in September 1986, were yesterday acquitted of a charge of culpable homicide for causing the disaster, Jim Jones writes from Johannes-

burg.
The Witbank magistrate said the officials could not have foreseen the "catastrophic situation."

#### Gulf missile strikes

Iraq and Iran yesterday exchanged missile strikes, with heavy casualties reported in Teh-ran as Baghdad warned it would keep up the blitz, Reuter reports from Nicosia.

Iraq said it fired six missiles in six minutes at Tehran around mid-morning yesterday and the Iranian news agency said at least 10 people were killed and 100

Agency said China had handed Hanni's ambassador in Peking a note reiterating its claim to sovereignty over the islands.

#### Michael Cassell looks at the clash in personalities and politics behind Mr Benn's challenge

### Labouring over socialist policies

the Labour leader, would have preferred to spend the next six months fighting the Tories and knocking his own party into better shape, he will have to deploy all his political skill and experient all his political skill and experi-ence in an effort to neutralise the hard left wing of his own party.
He appears to be relishing the prospect of the personal challenge to see off opponents he regards as politically irrelevant, but whom he believes have played a spoiling role out of all proportion to their true strength. The hope is, that, given an overwhelming victory, any temporary diversion will prove to be to the party's long-term electoral Mr Kinnock will nevertheless

Benning mates: Eric Heffer (left) and Tony Benn

be angry over a challenge which will inevitably be devoured by what he endearingly refers to as the "media carnivores." Now, MR TONY BENN, the MP for Chesterfield, has been the champion of Labour's left wing nary skirmishing, he is forced to take seriously both the challenge and those who have made it. since opting to return to the backbenches after Labour's general election defeat in 1979. He first became an MP in 1950, but was debarred from the Commons following the death of Lord Stansgate, his father, which made him eligi-ble to sit in the House of ning. But their decision to fight is borne out of frustration with a Kinnock-led party which they believe has set off in the wrong Lords. He subsequently renounced his title and was re-elected as an MP in 1961.

pite his lack of influence Despite his lack of influence with the current party leadership — Mr Benn and Mr Kinmock have apparently not spoken for years — he can claim
to be among the most experienced of his Labour colleagues,
in terms of ministerial office.

Mr Benn has also called the restoration of "effective" trade Mr Benn has gone out of his and apologetic" and accused it of would be abolished and, after a giving the party an identity cri-sis. leadership's abandonment of the cerned with personalities. The

As for policies, Mr Benn and cause of ordinary working peoleft accuses Mr Kinnock of what

Mr Heffer say they want to see ple, with the vision of a continuthey describe as a near-Thatchersocialism restored to the political ing "struggle" by the miners,

heights" of the economy, like the deny the party's class roots. banks and leading companies.

The leadership believes they will have little difficulty in

in working together at the Department of Industry in 1974. Mr Kinnock and his colleagues Mr Kinnock and his colleagues continue to re-emphasise the self-evident need for a fundamental review of policy in the wake of a third election defeat, but stress with equal conviction their determination to maintain and promote the principles of democratic socialist

The proof of the pudding, how ever, will be in the policies which actually emerge from the present two-year review, a process which could prove considerably less traumatic for the leadership if a troublesome left wing has been

soundly trounced.

But if the outcome of the contest for leader and deputy is pre-dictable, the margin of victory who will be fighting for every single vote between now and October's annual conference.

There is also the prospect that, spite the joint-ticket approach allegiances will be split, with supporters of Mr Kinnock not necessarily backing Mr Hatter-sley, who has not won many plaudits in his role as deputy

The conference voting will be based on the electoral college sys-tem first employed to elect Mr Kinnock and Mr Hattersley in 1983. Forty per cent of the votes will go to the trade unions while the constituency parties and MPs will account for 30 per cent each.

Mr Benn and Mr Heffer will be looking for the majority of their support from the constituency crties and will hope for backing from up to one quarter of the 229-strong parliamentary party. The leadership expects support unong MPs to be minimal.

Few trade unions are likely to abandon the present leadership and, despite its recent swing to the left, the powerful Transport and General Workers' Union with 8 per cent of all electoral college votes - is not expected to be among the deserters.

This week's embarrassing silence by the party leadership over the inter-union row involving the TGWU can only have reinforced the damaging impres-sion of a party primarily answerable to the unions.

It has also underlined the scale of the challenge facing Mr Kin-nock in his drive for Labour's lenge which he is insistent will not, be diverted despite Mr

### **Accelerating Expansion of** Japanese Economy

Strong domestic demand boosts the economy

The expansion of the Japanese economy has been accelerating since the second half of 1987. Active domestic demand has stimulated industrial production, which in turn, has improved the employment situ-

**Upcreeping Import Prices** 

116 114 Import Price Inde (Contractual Currency Basis) 112 110 F 108 106 104 102 Price Indexes 100 Ш ΙV 1987

Note: Oct-Dec., 1986 = 100 Source: Bank of Japan

demand, household demand shows a steady growth in consumption, boosted by increased overtime pay and bonuses in addition to the steady increase in net income due to the implementation of tax cuts. Department stores report healthy sales of household electric appli-

> ances, furniture, art objects, and jewelry. Clothing sales have been moderate despite the warmer-than-usual weather this winter. Housing investment, especially in privately owned houses, continues its upward trend. In the corporate sec-

tor, capital investment has been increasing favorably. Machinery orders in the private sector, excluding shipbuilding and electric power, which are seen to anticipate future trends in facility investment by about six months, have increased for two consecutive months. October and November represent increases of more than 20% over last year's figures.

Government spending has also been accelerating since last fall as a result of the emergency economic package. Public works

Focusing first on the aspects of contracts increased 5.9 percent in the first half of fiscal 1987 on a year-to-year basis, but zoomed 28.8 percent in the October to December period.

On the other hand, export levels have slowed their rate of expansion. Because of strong domestic demand, however, sluggish exports are not likely to sap the vitality of the economy.

Rapidly improving employment situation

Propped up by favorable domestic demand, industrial production is showing remarkable strength. In the fourth quarter of last year, mining and manufacturing production made an excellent increase of 9.3 percent over the same period last

The employment situation improved dramatically, bolstered by the rapid expansion in production. The effective job-offer index, which is the ratio of the number of job offers to the number of those seeking work, rose by 0.2 percentage points from the previous year, to the 0.81 level in the October to December period. This fairly rapid improvement, as compared to the two previous economic expansions, is solely due to the considerable increase in the number of job offers, which in turn indicates the speed of current business expansion.

Stability of commodity prices sustained by the strong yen

Commodity prices remained rela-

tively stable under accelerated busi-(Advertisement) ness expansion. Wholesale prices dropped 1.1 percent and consumer prices rose by only 0.8 percent in

This stability of commodity prices can be attributed to the following reasons: (1) Import prices have fallen on a yen basis, under the influence of appreciating yen since last autumn (from 140 to 120 yen to a dollar), (2) Many foreign products, which became cheaper due to the stronger yen, have flourished in the domestic market, serving to cool down strong domestic demand. (3) Oil prices have been weakening since last autımn. In short, all of these factors appear to be supported by the strong yen.

Nevertheless, the future stability of commodity prices seems to be fragile if the yen begins to depreciate. First of all, operating rates for industries, especially in material industries, go up rapidly as business expansion accelerates. This may lead to a tight future demand and supply condition.

Second, import prices are likely to rise. When import prices are computed on a contractual currency basis, which in most cases is the U.S. dollar, prices of materials, such as lumber, textiles, and metals, show considerable increases (see chart). This seems to be, primarily, because of a general recovery of global demand/supply balance for materials, accompanied by the progressive decline of the dollar. Therefore, if the yen stops rising, it is quite likely that the prices of imported commodities on a yen basis will go up.

It appears that the rise in the ven has been successfully holding down commodity prices so far. However, an increase in prices may surface in response to the movements of the foreign exchange market. The economy of Japan functions soundly under stable commodity prices and business expansion. However, considering the uncertainty of the foreign exchange market, adequate care should be paid to future commodity prices.

### Satellite TV reviews effective channelling

BY RAYMOND SNODDY

OWNERSHIP of Super Channel, programme supplier to Super the London-based European satel- Channel has suggested that lite television channel launched Super Channel and Sky, also still by Mrs Margaret Thatcher, the losing money, should sit down Prime Minister, in January 1987 seems likely to change in the next few months.

The loss-making general entertainment channel, owned by 14 independent television companies and Mr Richard Branson's Virgin Group, has been having talks on a possible merger with Sky, Mr Rupert Murdoch's rival channel.

At the same time, the Television Broadcasting Company, a consortium led by Mr Michael Green's Carlton Communications and including Thames Television, London Weekend Television, Dix-ous and Saatchi & Saatchi, has been seeking a majority stake in

Super Channel is now available in 11m homes across Europe through cable television networks. Already 246m has been invested, and losses this year are likely to top £2m. Several independent television companies facing increasing commercial and political pressure are leging. political pressure are losing enthusiasm for funding the chan-

Mr Michael Checkland, director the two channels general of the BBC, an important popular package.

and do a deal.

The two competing general entertainment channels are vir-tually splitting the English language pan-European television advertising market which has been developed from nothing in 1982-83 to an estimated \$22m this year. Because of cost-cutting between the two channels, the rate for 30 seconds of advertihas not grown with the size of the market and has tended to be held down to between £300 and £500.

Apart from being a programme provider the BBC's interest in the future of Super Channel also stems from its involvement in Eurosport, the planned new European satellite sports chan-nel. Eurosport is a joint venture between Sky and a number of the public service broadcasters who are members of the European Broadcasting Union.

If Sky and Super Channel were to merge it would free a satellite transponder which could be used to broadcast Eurosport. Together the two channels would make a

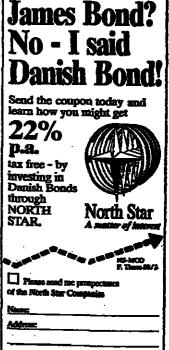

#### Kier moves into international property finance By Andrew Taylor

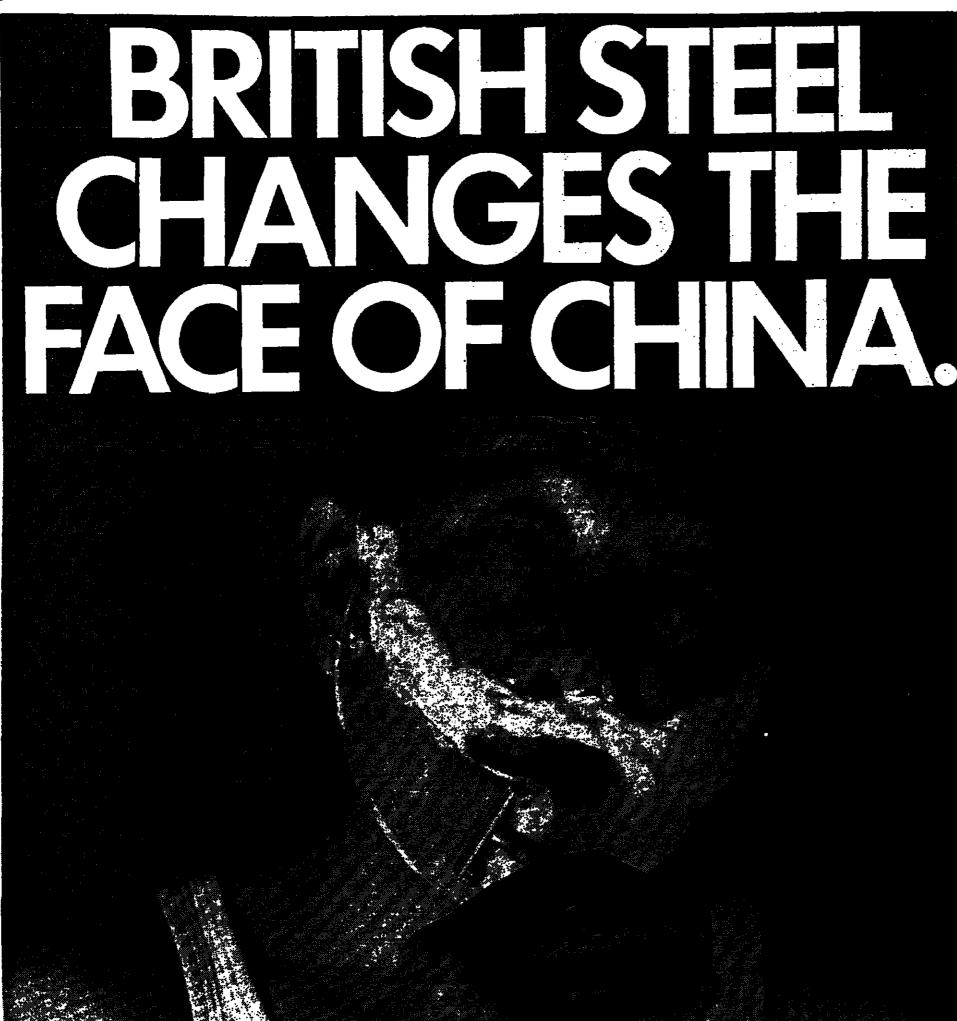

KIER, the contracting arm of Beazer, the British construction group which is bidding more han 11bn for Koppers, the US aggregates business, is launchi a project development compa to participate in the funding of international projects.

The new company, Kier Projects, will use its ability to provide finance for schemes as a lever to win construction work for the contracting arm. The company expects to sell its invest-ments quickly and does not intend to become long-term investors in commercial prop-erty, which might conflict with the property holding interests of the main Beazer Group.

Kier Projects is already provid-ing all or part of the finance for a retail warehouse in Burnley Lancashire and a 350-berth marina in East Angila. In partnership with C. Itoh, the Japanese trading group, it is also involved in a office and retail development in

**British Steel** in shape for things to come

### **Industry's profits** rise sharply on buoyant demand

vices

petitive gains in overseas mar-kets flowing from the pound's sharp devaluation in 1986. Official figures released yester-day from by the Central Statisti-cal Office show that the gross trading profits of industrial and commercial companies (net of stock appreciation) rose by 21 per cent in 1987 to £67.2hn.

Part of that increase reflected the inclusion for the first time in the official figures the profits of newly-privatised companies like British Gas, British Airways and BAA (formerly British Airports Authority). Even excluding profits generated by those companies, over 15 per cent.

industry's profits have been rising sharply since 1981, although the collapse in world oil prices during 1986 led to a stump in the profits of companies operating in the North Sea. There is little expectation, however, that the recent pace of gains will be maintained during 1968. The pound's sharp appreciation

against the dollar during 1987 and, more recently, against the additional payments resulting from the cant squeeze on the margins of exporters, while intensifying 1986.

year begins to slow.

Recent studies by the London.
Business School and securities house Phillips & Drew suggest that profits may stagnate in the second half of 1988. That analysis about their accuracy and in is supported by the pattern of profits growth in 1987, with strong increases during the first 9 months of the year being fol-lowed by a slight fall in the final three months.

three months.
Yesterday's figures show that
the gross trading profits of nonNorth Sea companies hit £57.7bn
in 1987, up from 47.3bn the previous year. Profits for companies
operating in the North Sea rose
from £8.4bn to £9.5bn, but the latter figure was only half the level before the oil price collapse. The CSO said that dividends

that increase in part reflects the buoyancy of profits, but it also includes the dividends paid by

### Capital spending on chemicals sees surge

This projected increase, shown ment planned for this period is in a survey published yesterday aimed at modernisation of exist-by the Chemical Industries Asso-ing facilities, while 39 per cent is ciation, is likely to be followed by earman a further rise in investment in plants.

The association said the spend-ing plans reflected the strong and broad demand for chemical products and the industry's strong intent to develop its domestic manufacturing base.

The association said the big projected rise in capital spending reflected confidence in the UK economy and prospects for the

some 26 per cent higher in real performance" chemicals what terms than that intended a year responsible for 19 per cent.

UK CHEMICAL companies are investing more, with total capital spending this year likely to be 194 from 1988 to 1990 is £5.5hn, comper cent higher than in 1987 at £1.7bn, taking inflation into account.

About 45 per cent of the investment the association's survey last year.

earmarked for new or expander which accounts for roughly a quarter of total UK chemicals output of £20m, is responsible for

a particularly large slice - 37 per cent - of the envisaged capital spending between 1988 and 1990. The next biggest industry seg ment in terms of investment chemical industry.

The industry's envisaged spending for 1988 and 1989 is some 26 per cant higher in real performance" chemicals and pastics, which accounts for 23 per cent of the envisaged investment, followed by speciality or "high-performance" chemicals which is

### Boeing admits delay in offset contracts

BOEING, the US aerospace com-pany, has acknowledged that there have been delays in its award of contracts to UK compa-nies after the Government decision to buy the Boeing Awacs early warning aircraft.

"Some delay has been encoun-tered only because of the number of licence requests that have been made and the subsequent review of data to be released",

Boeing said. Boeing gave a contractual commitment to the Ministry of Defence in December 1986 to award £130 of high technology work with UK companies for every £100 spent by the MoD on buying six Awacs aircraft for £860m. This meant that Boeing agreed in December 1986 to spend £1.118bn with UK companies over the eight years, from January 1987, of the Awacs purchase pro-

Plessey, the British company with one of the biggest involve-ments in the UK participation in the Boeing offset work, said it had been awarded only £1.25m of work. The group had expected orders worth 250m over the past 12 to 15 months. It said work on the Boeing Awacs radar had not created one new job.

This is despite Boeing's promises when it bid in November 1986 for the Awass contract to replace the troubled General

Electric Company's Nimrod air-borne radar aircraft, that "buying this system (the Boeing Awacs) will bring 40,000 new jobs to Britain. And that is just in the first five years.

"In 20 years, the ongoing con-tracts and partnerships with Boeing and its industry team will lead to an estimated 80,000 British jobs altogether," Boeing said.

Brochures prepared by Boeing as part of its sales pitch also claimed that an order for Awacs. would create 1,500 British jobs within six months (from Januar 1987) and add a further 3,000 Brit

ish jobs within the first yes The company said then that the 130 per cent offset commitment meant more UK jobs. "Boeing estimates that these will total more than 50,000 in the next

eight years."

Boeing said it could not talk about the number of jobs created or maintained by the UK order for Awacs.

Mr Nick Nelson

Mr Nick Nelson, former managing director of DHL International (UK), whose photograph appeared in the Courier and Express Services survey on March 21, is managing director of Royal Mail Parcels.

### Change in fortunes leaves savings at 'lowest level'

ational Savings advertisment. Not very well, has to be the answer for many people. The savings ratio — or the pro-portion of its income the personal sector saves — has now fallen to

BRITISH industry's profits competition in the UK market. Figures published yesterday surged last year as companies Manufacturing companies are took advantage of buoyant also expected to face an acceleration in 1967 compared with a peak of domestic demand and of the competitive gains in overseas markets. growth of productivity seen last age of 10 per cent during the year begins to slow.

Recent studies by the London Yet some caution is needed as

BRITISH SAVING as a prop tion of personal incomes fell last year to the lowest level for 28 years, according to official figures published yesterday.

The Central Statistical Office said the savings ratio dropped to 5.6 per cent in 1987, com-pared with 7.4 per cent in

lower than in any year since 1959 when the ratio was 4.9 incomes, regarded as an indi-cator of living standards, grew strongly in 1987, rising to a level 3.2 per cent higher than

First is the effect of house buysaving. Council house sales and the trend towards home ownerincreased total savings in the personal sector. Second are the effects of tax cuts for higher income households. There is evidence that the rich save more of ures are close to the true trend, they suggest a remarkable

### AN IMPORTANT MESSAGE FOR ABBEY NATIONAL MEMBERS FROM SIR CAMPBELL ADAMSON, CHAIRMAN.

This week I was able to report that 1987 was our most successful and profitable year to date. We continued to build on our traditional business of home loans and savings and offered a wider range of innovative products and services.

You will have also read in the news columns that the Board of Abbey National has decided to recommend to members that Abbey National converts from a building society to a public limited company. It has reached this conclusion because it believes that, as a company, Abbey National will best meet rapidly changing market conditions and extend and improve its services to members.

In taking this course we will retain Abbey National's traditional commitment to the provision of home loans and providing security for savings, and it will allow us to build a stronger, more widely based, Abbey National for the benefit of all its members.

Preparatory work has now been put in hand and short of unforeseen changes in circumstances, the Board will, in due course, put full proposals to members and ask them to vote on the change. This will inevitably take time. During that period we will take every opportunity to keep members fully informed.

members' information office, abbey national, abbey house, baker street, london nw1 6xl.

We now offer an even wider choice.

ARRIVALS

JAPAN AIR LINES NEW NON-STOP SERVICE FROM FRANKFURT TO TOKYO. EVERY SATURDAY AT 1710.

From April we have an even wider choice of non-stop flights to Tokyo. And with 8 non-stop flights leaving from Paris and London, our convenient evening departures offer even better connections from Europe. We widen your options, as you broaden your horizons.

They found it hard to describe their businesses succinctly because Control Data had grown into a sprawling group under the autocratic leadership of its founder, William Norris. Diversity, he believed, would help counter the cyclicality of its mainframe computer business.

When, however, several key activities, notably computer disk drives, were left behind by fleetfooted competitors in the mid-1980s, Control Data found that its top heavy management structure and corporate culture dominated by an engineering mentality left it ill-equipped to meet the chalenge. It ran up losses of \$832m in 1985-86 and went into technical default on bank loans.

"Our bankers lost confidence in the company's ability to manage its assets," says Robert Price, who succeeded Norris as chairman and chief executive in January 1986. "We were simply engaged in too many businesses and management was too central-ised for our diversity."

After 25 years in the company, six as president and deputy to Norris, he set about radically changing the way he and his colleagues did business and sharply tightening the focus of the company. "The most important thing I've had to learn was decentralisation. Now it feels comfortable, natural for me. Devolving responsibility to more junior operational managers "has freed up management attention and the group's resources."

Over the past two years, Control Data has done away with almost half the top management jobs, cut its workforce by 25 per cent to 30,000 and sold 13 major businesses. The disposal of its Commercial Credit finance sub-sidiary netted around \$1bn which

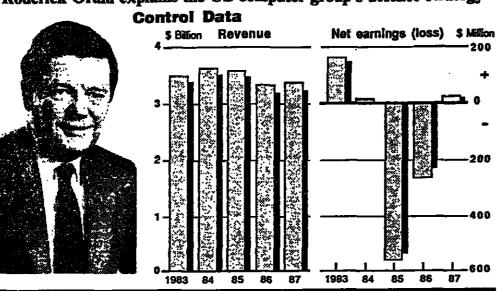

Among other measures, the company revitalised its product range, revamped manufacturing, instituted more formal and disciplined management procedures down the line and improved its internal planning, budgetary and

Having made the difficult or grist for the takeover mill, are change in corporate culture and disk drives and supercomputers. structure, senior managers face Much of Control Data's reputa-almost as big a challenge in tion had been built on them but building up sales and profits. by the mid-1980s they were fast

more compact, cheaper and faster hard disk drives, the data storage products division lost \$350m in 1985. When Lawrence Perlman took charge of it that year it accounted for \$1bn of the group's assets - half in stock - and 19,000 employees. Today it has

\$200m of assets, two-thirds in stock, and only 8,000 employees. The first low-labour cost foreign plant for the drives was opened in Singapore last year to be followed by a second also in the Far East this year. A new product line geared to

the rapidly growing mass market has completely shifted Control Data's emphasis. In 1984 it produced 50,000 disk drives with an average gross profit margin of 40 per cent. This year it hopes to se to 1m with a 20 per cent margin. New product development was

accelerated by setting up a new operation in California called igidyne. Its managers were given a small entreprenuerial stake and let loose on the problem of designing a range of small drives, with minimal bureau-cratic control from Minneapolis. Becoming a low margin, high volume producer will not solve Control Data's problems. It must continue to tackle the fact that product life cycles are shortening dramatically as the cost of disk

drives continues to plummet from \$50 per megabyte of memory at the beginning of the decade to a forecast \$2 by the end of the decade.

"If we do our job right," Peri-

man says, "it will take our competitors as long to climb the technology curve as it takes us to climb down the cost curve."

A similar approach was taken earlier on supercomputers with the setting up of ETA Systems in August 1983. Control Data has to date pumped over \$100m into the unit, despite its earlier financial difficulties, to produce the suc-cessor to the Cyber family of machines. The first models received an enthusiastic user reception when they were unveiled last autumn but although volume has built up steadily, ETA will not be profitable until next year because of further development costs.

At the bottom end of its prodnet range, ETA will face stiff competition from a host of small "mini-supercomputer" makers such as Alliant and Convex These have shown that the use of supercomputers, once the expensive preserve of corporate head-quarters, will be snapped up further down an organisation if the

price is low enough.
ETA is part of a new computer systems and services group headed by Thomas Roberts, who admits "we were fat and kind of bureaucratic" before the shake-up. Expenses have been cut sharply, the marketing organ isation strengthened, and respon-sibility for their businesses pushed down to managers around the world who are now organised on geographic rather than product lines.

The division's activities have been more sharply focused around Control Data's traditional strengths in scientific, engineering and other applications using huge databases. But it will be a long haul. "I believe we will have a pretty decent level of earnings in 1969," Roberts says. A similar exercise of cutting

away marginal activities was undertaken by the business services division and selective acquisitions were made to fill in gaps in its main activities. These include computer-based payroll. personnel, marketing, and TV

audience measurement services. "Now we've got to make the changes pay," is the message managers are pushing throughout the company. John Buckner, the executive vice president and chief financial officer who stabilized the company. lised the company's finances and is still introducing new manage-ment systems, says: "Perhaps we are half way through - though the second half will be way more fun building things up." But he warns: "We're still a takeover candidate and will remain so

until we're highly profitable."

Smoking at work

### Coping with a burning issue

Michael Skapinker reports on guidelines for employers

of a cigarette. But time spent in out of its regular staff consults working party should review curthe room does not count as part tion meetings, during which rent practice within the organisaof the working day and has to be non-smokers repeatedly comtion and should set out the basic

harsh. Others would argue that smokers should be grateful that the company permits them to smoke on its premises at all. Employers who have not yet wrestled with such issues should probably begin to do so. A report published this week by the Department of Health and Social Security says that non-smokers who regularly breathe in other people's smoke have a 10 to 30 per cent higher risk of lung can-

cer than people who are not exposed to smoke. The report calls for smokers to be segregated from non-smokers at work and in other public enclosed spaces. The report says that "non-smoking should be regarded as the norm in enclosed areas frequented by the public or employees, special provision being made for smokers, rather than vice-versa."

it adds that "improved ventila-tion, or the mixing of smoking and non-smoking areas within the same enclosed space would not seem to provide adequate safeguards" for non-smokers. Some companies have already done more than segregate their smokers. Mori, the polling organisation, has completely banned smoking in its offices.

Mori chairman Robert Worcester recalls that 12 years ago, after the departure of a smoking employee, the staff realised that they were all non-smokers. "We thought 'what a lovely situation. Let's try to keep it that way." Mori's recruitment advertising makes it clear that successful

applicants will not be permitted to smoke at work. Many applicants are positively enthusiastic about the policy, he says. The company has also negotiated small reductions in its office cleaning bill on the grounds that there are no dirty

ashtrays to clean.

Today, Worcester says, several
of Mori's 78 office employees do
smoke. They simply don't do so
there. "We're not draconian about it," he says. "I feel very strongly about freedom of choice." The policy doesn't apply to what they do outside the

office. British Petroleum decided to

Junior staff might be reluctant to express their objections . . . "You're not told:

There are asbestos tiles in the office, but the other people don't mind. Do you?""

each company needs to decide what policy best suits its own circumstances. But David Simpson, the director of Ash, says that the organisation does not recommend that companies allow employees with private offices to

"People with private offices tend to be more senior and allowing them to smoke can cause resentment among more junior smokers," he says.

He says he is also against companies permitting smoking in larger offices even if all the nonsmokers say they don't mind. New employees and more junior staff might be reluctant to express their objections to smok-

ing, he says.
"No other health issue is treated in that way," he argues.
"You're not told 'there are asbestos tiles in the office, but the other people don't mind. Do

Ash argues that the basic principle of any policy must be to ensure a smoke-free environm for non-smokers. It recommends a five-stage programme for the entation of a smoking pol-

well when deciding the final pol-

Implement the policy.

Announce the final policy to the workforce. Order signs and prepare the smoking area. Set a date for implementation. Ash recommends a period of three months. The policy could be introduced to coincide with the move to a new building or an annual event such as National No Smoking Day.

The policy should be included in the official terms and conditions of employment and should be made known to new members of staff.

Simpson stresses that adequate notice and consultation with the workforce are vital parts of the process. If organisations implement a smoking ban without notice, aggrieved smokers might claim that their contracts have been altered without consultation and that they have been con-structively dismissed. A three month period would be sufficient notice of a change of contract. Ash says.
It is also important, Simpson

says, to "make sure that your policy has some emergency provision for smokers who cannot do without a cigarette." This could be a smoking room. Companies too small to provide one could make it clear that employees will not be disciplined if they go outicy at work.

Set up a working party. This not be disciplined if they should be representative of all side for a smoke, he says.

### Five ways we can help you to set up in Gwynedd.

If you want to relocate or set up in Gwynedd, financial help is at hand.

There are many possibilities:

with the Welsh Office Industry Department).

One, grants from the European Community.

Two, grants from the Welsh Development Agency, for the conversion of redundant buildings to business use. Three, Regional Selective Assistance (negotiated

Four, County Council Grants for the adaptation of premises, or for buying new plant and machinery.

Five, grants from the Wales Tourist Board for qualifying projects in the tourism sector.

To find out how you could benefit and to cut through red tape, call Eurwyn Lloyd Evans on (0286) 4121 or Helen Winter-Jones on (0222) 388398. Or send off the coupon.

I want to know about Gwynedd, N. Wales.

and Training

through the implications and taken action in advance. Take for example one specific development in Europe - the 12-nation European Community's projected creation of a single market of 320m consumers in employers, numerous young 1992. Dr Leon Selig of the Insead Europeans have realised that business school in France has career paths will be changed by the freedom of movement across studied how the prospect is being the freedom of movement across approached by 50 companies in national boundaries implied by

approached by 50 companies in six of the countries concerned.

"Around a third of them were getting to the top in managerial work, they will need to be highly mobile between countries. So, Europe as one market, but taking mobile between countries. So, steps to equip their key people to while a standard passport may be treat it as such," he says. "About less significant within Europe, as many again were aware they'd great importance is likely to be be affected although they hadn't attached to qualifications seen by decided what to do. But the other employers throughout the single third didn't seem to acknowledge market as a passport to senior any need for different action at jobs.

In contrast to those laggardly, mobility has evidently convinced

concentrates on international aspects of management. The resulting rise in applications for the MBA degree course at Inse one of the relatively few schools recognised as a training ground for international managers - has led it to increase the student capacity of its one-year course from 280 to 420 in the coming

As yet, however, there does not seem to have been a comparable

rise in demand by British young people for full-time MRA courses in their own country's business schools. Few, if any of the schools, could run the courses economically had they not culti-vated large insakes from abroad, especially outside Europe. One Europe at least, that the most useful carear passport will be a master's degree in business administration from a school that and Taiwan, which may well be sending hand-picked people to absorb western management training as a precursor to reprod-ucing it, with cultural adjust-ments, in schools of their own. Something similar evidently applies to full-time master's degree courses in US business schools. America trains far more MBAs than any other country:

buoyant mood when he In a document protiment could have come from any

number of British industrialists.

Why are they so optimistic? First, because they believe that the national mood is more favourably disposed towards business and risk-taking than it has been for decades. Second, they are excited by the sudden burst of discussion about how best to develop Britain's managers — a debate inspired by the publication last year of two reports: one by Charles Handy of the London Business School and the other by John Constable, for-mer director general of the British Institute of Management and Roger McCormick, then of British

The reports provided some chilling data on British industry's failure to establish a coher ent strategy for the development of its managers. Both reports followed this up by mapping out a possible route forward, a two-part national qualification that would require young managers to com-bine formal study with the acqui-

sition of practical skills. The authors of the reports said that their proposals would require some financial backing from the government. But even more important, they said, would be the full-blooded commitment

was to define the sort of manage-ment education that industry wanted, allowing companies, rather than educational estab-

shments, to set the pace. "Hitherto, we've had a suppli-er-dominated market," says Mr Education and Development, John Wybrew, executive director under the aegis of the Confedera-of one of the Charter Group's tion of British' Industry, the working parties. retical analysis and are modified by the theoretical conclusions derived from that analysis.... Thus foresight based upon the-ory, and theory based upon understanding of the nature of things are essential to a profes-

Whitehead's three-tier struc-ture of foresight built on theory founded on understanding of the nature of things is certainly one which academic business schools like to think is essential to the work of managing. But there must be doubts whether it actually is so. Nor is the reason solely that, while business schools teach many psychological and sociological theories about people, none could surely claim to be based upon understanding of

mining future policies rely liberally on intuition rather than the oretical reasoning. Of 70 top managers of big US companies managers of big US companies ing looks ahead, asking the quesquestioned by the American man-

Charles Handy: misgivings about structures imposed top-down

agement professor Weston Agor<sup>2</sup>, ble things I can do in this 69 said they frequently used intuitive as distinct from intellectual to lead to the result I want to processes when deciding some achieve? But the

processes when deciding some thing important.

One even blew the gaff on semior executives' universal practice of sending underlings scurrying to gather facts and produce analyses supposedly to guide the superiors' judgment on issues still in the balance. "Sometimes one must dress up a gut decision in 'data clothes' to make it acceptable or palatable," the US company president said. "But the findings suggest that when people are doing dynamic work they mostly reach their decisions by looking back on earlier experience, and asking themselves a different question. It is similar to others I have previously handled with the kind of requirements now? The proadbent's research also this fine tuning is usually after. company president said. "But Dr Broadbent's research also this fine tuning is usually after rebuts the belief that a better professional approach to manage-the fact of the decision."

How people actually deal with challenges of that kind has been studied by the British psychologist Dr Donald Broadbent. Although he personally upholds the importance in management work of the type of thinking based on the intellectual grasp and rational application of stated principles, his research findings<sup>3</sup>

ting, and managing the system. But the notion that effective managers can be developed out of an assemblage of competencies is doubted, to say the least, by expe-

dozen so-called "key competen-

cies" of a practical kind. They

include communicating, negotia-

rienced teachers of management. An example is Professor lain Mangham, of Bath University. who says: "I've a dreadful feeling the

result would be like a man built of Lego bricks. The bits might fit together in roughly the right shape, but it couldn't be the real thing unless it was also given the essential spirit. And a special kind of spirit is all important in a good manager. You can even feel like watching a top-class athlete.

Moreover, not only the competencies approach but also the campaign to elevate management to a profession are questioned by Professor Charles Handy, whose study of how managers are developed in other countries provided much of the initial stimulus for the campaign

"I'm pleased about the way it is getting companies to realise the importance of management education and training, and that they ought to put serious effort into it," he says. "But I have mis-givings about trying to impose a structure on it from the top down. We'd do better to be more pragmatic in the British tradition of constructing general law from particular cases. We should look at what is being done, and when we see something good, build on

it intuition plays a large part at the corporate heights, thinking of other than theoretical kinds plays a greater part at the less ethereal levels where the vast majority of management jobs are sited. There the work is largely dynamic, consisting of series of limked challenges. The executives and after several tries at the task are confronted with a situation requiring them to act, their action results in a new situation which requires further action...

grasp of relevant principles by ment development, which I do is not to say management ought to be made a profession, which I don't we have too little understanding of it for it to be one."

So perhaps management should be content to remain with, albeit improving in. its principles involved both before and after several tries at the task. He also observed how their peraction results in a new situation which requires further action...

Most of the groups got better will necessarily not to say management ought to be made a profession, which I don't to say management, which I don't to say management ought to be made a profession, which I don't we have too little understanding of it for it to be one."

So perhaps management with, albeit improving in. its principles involved both before and after several tries at the task. He also observed how their peraction requiring them to act, their some expectations are confronted with a situation should be content to remain with, albeit improving in. its principles involved both before and after several tries at the task. He also observed how their peraction requiring them to act, their some expectations are confronted with a situation and trooper to be made a profession, which I don't to say management ought to be made a profession with two beautions of the profession with the say management and the velopinent. with practice, but in some cases Alfred North Whitehead well their grasp of the principles knew. There was no reason, he meanwhile deteriorated. One of wrote, for ranking people higher them improved in its knowledge than others "in proportion to the of the principles, but its performance of abstract mentality mance grew worse with practice.

It may therefore be to the good that purely intellectual learning that purely intellectual learning structure for managers just the contrary, a due proportion of craftsmanship that purely intellectual learning structure for managers just

World classes

required in business.

A further danger lies in the concentration on programmes taken only by managers working in seminars and by textbooks.

Are you looking for better management skills?

What should a business school provide to best help you?

An experienced, multinational faculty for teaching you can rely on

☐ The latest management thinking and techniques from around the world

☐ The chance to discuss management ideas and attitudes with successful executives from different countries, backgrounds and industries

☐ A relaxing atmosphere away from work pressures in which to reflect on personal performance and ambitions

If you have ticked any of the boxes above, INSEAD is the business school you are looking for.

Contact me for more details on INSEAD's executives programmes:

#### Team building

### Seven go to Devon

Dart Centre in Devon.

"It has definitely proved valuable," Mr Morgan continued. "I think groups like ours would benefit by doing something like that at least once a year."

The seven Tektronix execu-

tives, who at the time of the course were all concerned with sales of the company's high-tech work-stations, had sampled team-skills training before. But the previous programme had been an indoor event, in which they had combined in exercises such as building complex structures from an assortment of materials, and then reviewing their performances with critical aid from the company's external training consultant, Mark Wal-

On the course in Devon, which was a much more robust experience, the seven were accompanied not only by Peter Jones, Tek-tronix UK's personnel director, but also by me. I had accepted Mr. Jones's invitation to attend. believing that I would be purely an observer. But that imprewas abruptly dispelled within an hour of our arrival at the centre on the edge of Dartmoor.

By then the visiting party,

together with two of the centre's instructors, were already don-ning overalls and helmets fitted with lamps, ready to go caving. During the preparations, Mr Wal-ters appeared alongside me and whispered: "Don't tell anyone, but when we turn back at the end of the cave we go down a slippery slope, and I'd be grateful if you'd fall and pretend to break your leg or something. We want to find out how they cope in an emergency, you see."

The answer was that they coped very well in heaving 13 stone of fitfully screaming and

TVE THOUGHT back on it a lot feignedly fainting Dixon through utes before pick-up time. Within these past nine months, said the cave's corkscrew passages, a few minutes, however, some of sometimes thigh-deep in rheumy the team sensed that something about a team-building course that orange mud. It was a couple of was amiss. They rechecked the hours before they regained the map, snooped around in different open air and gently laid their directions, and returned only to burden down. Whereupon they had gone through in May last year at the River were somewhat miffed to see it. spring up again, jump about on was Dave Pettit, then second in the supposedly broken limb, and command and now the manager

pronounce itself miraculously of the team in real life. Seeing cured. Unfortunately the teamwork erson had gone to observe events deteriorated when the seven from the top of a hill some 200 gathered after dinner to consider yards from the minibus, he ran what lessons their respective per- up to them and looked into the formances in the cave-rescue field beyond. "Get that stuff up might offer for improving their here quick," he shouted.

His colleagues did so

"We're not having a frank discussion," said Paul Morgan after about two hours of talk had gone by. "We're just circling round the main points, hitting out and covering up, as usual."

His conezgues uniso — which was just as well. By the time they arrived, the "eagle", in the shape of a helicopter, was whirring in to land on the marker that Mr main points, hitting out and covering up, as usual."

The pilot's orders said that, if the

### Transatlantic lessons in retail development

expected to see its seventh straight year of growth in 1988, with January's \$12bn (£6.6bn) tax cuts followed by refunds in April, the North American shopping centre industry is still nervous about its condition. The question is whether Europe, where retail development is still accelerating, can learn anything from transat-

lantic experience. Overbuilding of shopping centres, for tax avoidance purposes growth which had taken shop-rather than to satisfy retail ping centres to more than 50 per demand, is obvious in Florida, cent of non-automotive, US retail Texas and parts of southern Cal-sales. "Now developers are taking." Texas and parts of southern Calsifornia; in the corporate finance market, leveraged buyonts and takeovers have led to groups owning two "anchor" department stores in one mall, leaving them with the option of closing one, or converting it into a discounter—neither of those being particularly healthy colutions for the starting of the Netherlands, which management of the Netherlands which management of the Netherlands which was a start of the Netherland larly healthy solutions for the

### MEET SOME OF OUR MOST VALUABLE PROPERTIES.

As you can imagine, we've a formidable body of knowledge in Jones Lang Wootton.

And much of it's housed in some rather formidable minds.

The fact is, we can put at your service some of the finest brains in commercial property.

Yet it's not what we know individually that gives us our edge.

It's the pooling of this knowledge, and the perspective this gives.

And we can draw on a big pool.

We've around 2500 people, in forty-five offices in sixteen countries.

They're our strength. They're highly trained and they're highly approachable.

Call us on 01-493 6040 if you would like to talk.

Put simply, we know our business, all over the world.

Whatever you need, you couldn't be in safer hands.

And please don't think we shy away from small jobs.

Small we're not, but professional we are. And we're not a bit shy about that,

Jones Lang Wootton

#### Compact store drives : down access times

VERMONT RESEARCH, UKbased pioneer of fast access, highly reliable semiconductor stores to replace disk drives, is offering a compact, 128m character (128 megabyte) unit cost-

ing £5,000. These units eliminate the electro-mechanical access time of rotating disk drives and perform in a similar way to the chip-based working storage inside computers.

The absence of moving parts on the Vermont Research prodticts means that the average time between failures is over 30.000 hours and repairs, if any, can be carried out on site in under 30 minutes.

The machines, known as Sierras, can resist shock, vibration and adverse atmospheric conditions that would cause comparable disk drives

#### Interchange sparks business vitality

directly into their computer networks.

"EDI has the potential to win or lose you business, radically change your market structure, change your relationships with trading partners and even change the structure of your organisation," says Rarol Szlichcinski, who led the study at Butler Cox.

Major retailers in the UK, Germany, and Sweden expec-

of their communication with trading partners via EDI by

**WORTH WATCHING** 

#### Quantum leap in the writing of braille

BRAILLE TEXT, conventionally embossed using mechani-cal machines designed 40 years ago, can be produced from both human and electronic sources using a £500 unit called the Mountbatten Brailler.

The machine is to be manufactured and distributed exclusively by Quantum Technology of Sydney, Australia, which will appoint agents throughout the world.

Many of the machines, however, will go direct to charita-ble organisations and sold on from there.

The total market size is thought to be about 10,000 machines a year. Most of this is currently held by US company Perkins, which sells the conventional mechanical machine at about £350.

The new machine was designed by Pankhurst Design and Developments of London, in conjunction with the Royal National College for the Blind. The project was funded by the lountbatten Memorial Trust. A standard braille keyboard is used so that operator con-

is used so that operator conversion from existing machines is simple for blind or partially sighted audio typists. The six dot matrix characters are embossed on to the paper by an electromechanical head at speeds that easily exceed maximum keyboard exceed.

Incorrect characters can be corrected by a special dot flat-tener in the head and, for training purposes, several £50 keyboard-only units can be connected to a single embossing unit.

In addition, the keyed material can be fed to a personal computer, where signized persons can make use of it.
Conversely, text produced by sighted (or blind) people on a personal computer's "qwerty" keyboard can be sent to the

brailler to be embossed These electronic refinements are expected to increase the employment of blind people in modern offices that use infor-

#### Sandia redraws the parallel line

A TEAM at the Sandia National Laboratories in the US has pushed back the frontiers of parallel computing. It has found ways of running 1,024 processors in parallel to achieve an operation speed 1,000 times quicker than one machine working on its own. The speed increase is nearly proportional to the number of processors (each of which has the abilities of a minicomputer). Such an advance was previously thought to be impossi-

In parallel computing, prob-lems are divided into small parts which are dealt with by many processors simultaneously, whereas in ordinary machines the parts of the prob-lem are tackled one after the

other. The accepted view so far has been that no matter how many processors were used, operating speed increases could not exceed 50 to 100 times that of one processor working alone. Technical difficulties with software has been the speed limit-

ing factor. But the Sandia team, using special algorithms (rules), has concluded that provided the problem itself is scaled up in proportion to the number of

processors, no barrier exists.
"This way of looking at par-allelism should have a big effect on parallel computing in the next few years," says Edwin Barsis, director of computing science and mathematics at Sandia. "We have shown that obtaining high performance on large-scale parallel computers is not an insur-mountable task."

Scaling up in this way par-ticularly suits Sandia, where complex problems in nuclear power and weapons research have to be tackled. But the 1,000-processor work might also benefit other large-scale computing problems, like long range weather forecasting. Work was carried out on the

only NCUBE/Ten machine far put into operation. Made by NCUBE Corporation of Beaverton, Oregon, it occupies a three feet cube and moves data at 7.7bn characters a sec-

#### FT LAW REPORTS

### Demurrage exceptions clause must be clear

NAVIERA SA Court of Appeal Lord Justice Staughton and Sir Ronaleyn

AN EXCEPTIONS clause in a charterparty exempting charter-ers from liability for demurage in specified circumstances including "unavoidable hin-drances" does not operate in respect of delay caused by con-gestion which began during lay-time in the absence of clear vording to that effect.

The Court of Appeal so held when allowing an appeal by Tourloti Compania Naviera SA, owners of Kalliopi A, from Mr Justice Evans's variation of demurrage liability awarded by arbitrators against charterers, Marc Rich & Co.

LORD JUSTICE STAUGHTON said that Kalliopi A was chartered to Marc Rich for the carriage of a cargo of shredded and baled scrap from Rotterdam to

The charterparty provided that demurrage was to be paid at \$4,500 per day, laytime to count from the first working day after due notice was given and accepted. Notice of readiness was to be given WIBON [whether in berth or not].

Clause 36 provided "The act of God . . . enemies, fire, floods . . and every other unavoidable hindrances which may prevent . . discharging . always mutually excepted." Clause 37 provided that neither charterers nor owners should be removable for the ers should be responsible for the consequences of strikes.

The vessel arrived at Bombay pilot station on June 30 1983. Notice of readiness was given. Laytime expired on August 20

By August 20 none of the cargo had been discharged. The vessel was still at anchorage waiting for

occupied.
On September 6 she was brought to the inner anchorage, and on September 8 discharge into barges in stream com-

From October 20 to November

of periods when the vessel was still delayed by congestion — from August 21 to September 5, September 6 to 23, and September

To the arbitrators the charter ers' argument appeared to be that neither laytime nor demurrage would run while one of the perils in clause 36 operated. That was not the argument put before Mr. Justice Evans or before the

Mr Justice Evans's reasoning ([1987] 1 FTLR 399,403]) was that for clause 36 to exclude liability for demurrage, it "must be clearly intended to do so".

He said "the words are clear: 'unavoidable hindrance . . . aiways mutually excepted must be commercial shorthand for 'nei-ther party to be liable for the consequences of, and the char-terers' liability ... is measured in terms of demurrage."

"So," he said, "the clause pur-ports to exempt charterers from their liability for what will be put forward as a demurrage claim." Mr Mildon for the owner

Discharge was completed on November 26 1983. Arbitrators concluded the vessel was on demurrage for 98 days, 2 hours and two minutes. At \$4,500 per to have that resulted in a liability of \$441,381.

On appeal Mr Justice Evans held the sum was very much less. He varied the award so that the amount due for demurrage was no more relevant exceptions to the running of laytime, but there should be exceptions which argue about the armount due for demurrage are reception will operate to running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions to the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions which argue about the running of laytime, but there should be exceptions to the running of laytime, but there should be exceptions to the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions about the running of laytime, but there should be exceptions about the running of laytime, but t

amount due for demurrage was \$175,539. The owners now appealed against that order.

Two of the findings of the award were that congestion was not unusual at Bombay at that time, and that it was foreseen.

On the present appeal it was foreseen.

On the present appeal it was foreseen example of the general principle said that congestion at Bombay that when a party was in breach

not umsual at Rombay at that It was described by Lord time, and that it was foreseen.

On the present appeal it was said that congestion at Bombay was an "unavoidable hindrance" of contract an ambiguous clause which prevented discharging for a time, and was therefore "excepted" under clause 36.

The charterers did not contend that the exception operated while solid basis in common sense, laytime was running. They agreed laytime expired en August 20. What they did say was that thereafter they were excused lability for demurrage in respect of periods when the vessel was that the content of periods when the vessel was that the content of periods when the vessel was that the content of periods when the vessel was that the content of periods when the vessel was the content of periods when the vessel was that the content of periods when the vessel was the content of periods when the process of the content of periods when the process of the content of periods when the vessel was the content of periods when the process of the content of periods when the process of the periods of periods when the process of the process of the periods of periods when the periods of periods of periods of periods when the peri

Hodson said the charterers had "reached a position of valuerability to delay ... which they would never have reached if they had compiled with the terms of

That reasoning was not applicable to the present case. The vessel was already affected by congestion during laytime; the charterers breach in falling to like the charterers breach in falling to discharge within the laydays did not of itself cause her to be

sthere was a strike which prevented stevedores working. The clearly provide that the charter arbitrators held that despite are were to be exempt from liability for the delay in the strike period, because the vessel was already on demurrage period, because the vessel was already on demurrage. There had been no appeal from that aspect of the award.

The clearly provide that the charter argued to any subsequent period. However, that was not a ground for holding the general rule to be inapplicable. Rather it was a consequence of the bizarre contract which the parties made of the award.

The clearly provide that the charter argued to any subsequent period. However, that was not a ground for holding the general rule to be inapplicable. Rather it was a consequence of the bizarre contract which the parties made of the award. It was established law that contract - that there should be "when once a vessel is on demurnon relevant exceptions to the running of laytime, but there should be exceptions which argut

> or if all available scrap were destroyed by enemies, fire or

> No doubt the clause could also provide exemption for the owners The question was whether "mutually excepted" showed clearly that the charterers were

> not to be liable for demurrage if vented discharge after laytime had expired.

> The court's conclusion on that point could be expressed in the same words as those used by Lord Edmund-Devies in The Dias - "no exceptions clause will prevent demurrage from continuing to be payable unless such is clearly the effect of its lan-

The appeal was allowed.

Lord Justice Stade and Sir Roualeyn Comming-Bruce agreed.

Specific services should be developed as quickly as possible to simplify the repayment of VAT on departure 📮

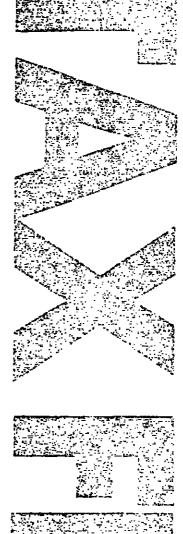

says Robert Chesary

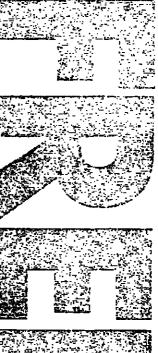

"We're doing our best", is the reply from Lars Welinder, Managing Director of Tourist Tax Free Shopping Limited, the npany which introduced the first commercial VAT refund service into the UK two years ago. "TFS has established a fast, efficient VAT refund system, offering overseas visitors a choice of both currency and method of repayment, including banker's draft and credit to bank, charge card or credit card

"Now we are working hand to introduce cash refund points at British airports and scaports, so we can offer tourists an instant cash refund as they leave the country. This is the method normally used by our sister companies throughout Europe, but delay in reaching the necessary agreements is holding us up. I find this strange, since our experience is that ellers receiving a cash refund on departure tend to spend it at once, in the duty free shops. But I'm sure it

Per further information on how ten free shopping benefit the UK tourist industry, call us on (01) 785 3277, fax us on (01) 785 7410, or write to Lars Welinder, Tourist Tex Poo Shopping Limited, Europa House 266 Upper Richmond Road, Lendon SW15 6TQ.

### Opera buffa goings on in Brooklyn

Moonstruck directed by Norman The Princess Bride directed by Hollywood Shuffle directed by
Robert Townsend Batteries Not Included directed by Matthew Robbins The Fox And The Hound

Where would we be without national stereotypes? Thanks to Hollywood movies everyone now knows, even if he has never set foot in Italy, that Italians spend all their time doing the following four things: eating spagnetti lis-tening to Puccini and Dean Martin, falling in love and conduct-ing family fends.

All these activities are featured in Moonstruck. But since the film is a comedy, and as written by John Patrick Shanley a deli-ciously blithe and moonstruck one, the off-the-peg Italianism seem less clumsy and prejudicial than in, say, your average brooding Maña opera. It all happens in Brooklyn.

ler a giant moon and to the strains of – yes, Puccini and Dean Martin – lonely 35-ish widow Loretta (Cher) accepts the hand of dumpy bachelor Johnny (Danny Aiello). But before the nuptials can happen, Mama-domi-nated Johnny charges off to his aged parent's deathbed in Sicily and our heroine promptly falls in love with Johnny's estranged brother Ronny (Nicolas Cage): number two son in a family that learly made its fortune compilng rhyming dictionaries.

Soon the passion-awakened widow and the one-handed baker he lost the other in an acciient he has never forgiven his brother for – are tossing between the sheets. And the one-night indiscretion is compounded by a visit to the opera (La Bohème, what else?) and by the kind of redblooded quarrels that befall only those incurably

no previous track record in ethnic comedy unless you count the film of Jesus Christ Superstar, conjures inspired performances from Cher and Cage and from the heroine's whole filmic family. Dad Vincent Gardenia is a croaking human walnut whose face

sional rampant cliché.

lofty, weary eye over her spouse's adultery (with a bosomy redhead) and her daughter's whirlwind The Princess Bride makes a show and her trangmer's whirtwind engagement and infidelity. And Grandpa (Feodor Chaliapin) has seen it all before and looks as if he has no wish to see very much of it again. He silently walks his wolf-hounds each night and traches them to her at the morn or comic connectes. But under-neath one senses something more like the courage of the descerate. Framed by scenes of a white-haired Peter Falk reading to his obstreperous grandson ("Is this a kissing book?" is the boy's first warning inquiry), William Gold-man's spoof-chivaliric screenplay ushers us into fairy-tale land. wolf-hounds each night and teaches them to bay at the moon. If the supporting cast is good, Cher and Cage are revelations. The numbed and nerdic actor who in Birdy and Peggy Sue Got Muried seemed like Hollywood's answer to Cro-Magnon man, without the charm, here explodes with goofy comic talent. And against his slo-mo physical dismay and foghorn-voiced passions Cher pits a fierce and fiertd ushers us into fairy-tale land. Two star-crossed lovers, hand-some farmboy Cary Elwes and beautiful Princess Robin Wright, fight the good fight against a host of dangers. These include an evil Prince (Chris Sarandon), a toad-like kidnapper (Wallace Shawn), a raving Spenish swous-man (Mandy Patinkin), a giant may ann nognorn-voiced passions. Cher pits a fierce and fierd mezzo authority. Even the actress's pursed beauty of feature, which in films like The Witches Of Eastwick and Musk looked as it had been animation. with a funny accent (Andre the Giant), a six-fingered Count (Christopher Guest) and a pack of Oh yes, there are also the Cliffs f Insanity, the Fire Swamp and the Pit of Despair. If you are a star-crossed lover in these circumstances, it seems hardly

proofed by a dozen face-lifts, here adds a misterioso quality to the vocal and gestural fireworks.

There are semimental fathities too many of that damned roman-tic moon. And composer Dick Hyman slops a ragu of sonic schmaltz over the film whenever he thinks it needs it. (It never does.) But for the most part this is a wonderful opera buffa for the cinema: a tale of lovable idiots, and form structures. seems to fissure completely full of sound and fury signifying whenever he smiles or frowns. complete confidence in its con-Mum Olympia Dukakis casts a ventions and even in its occa-

water dissolving into tears of joy. Most Frankenstein adaptations boiler room characteristics of the bare stage. The space becomes both a snowswept trindra and a omit the Creature's intellectual theatrical laboratory. The action evolution. Here, the observation theatrical laboratory. The action becomes dance drama with a difof the cottagers is compressed into a lovely Oriental sequence of gestures and bells. The gist is clear, and the Creature then per-forms his one act of heroism, saying the girl in the brook. As in Coloridge's tale of the Ancient Mariner, a considerable influence on Mary Shelley, there is water everywhere. Murders follow as a main house debut is one of the most promising in our theatre for

a human mate. a human mate.
"Memory brings madness with
it" says Mary Shelley, and the
poignancy of this event lies precisely in that observation. The
transforming process of creation
is another aspect of the Romantic

is another aspect of the Romantic imagination given telling expression in these sharp and well-organised charades.

This is a loyal and sensitive adaptation. But it is also much more. Without playing his hand too heavily, Mr Pope has gone beyond Frankenstein and dramatised a fascinating commentary upon the Promethean legend that so obsessed both the Shelleys.

so obsessed both the Shelleys, not to mention Byron himself. In this respect, the show is a wonderful companion piece to Howard Brenton's Bloody Poetry which receives a long overdue revival next month at the Royal Court. That play is set at the very time of Frankenstein's conception during the "heightened mood" of that extraordinary wet ummer at Geneva. Both Brenton and Pope have

treated the condition of exile in different ways. But this fine Citizens production will be most memorable for the innovative hitching of contemporary performance manners to the intellectual star of Romanticism. Frankenstein continues in the Gorbals until April 2.

### Cost of bank bail-outs

Barely an eyebrow was raised in Congress last week by the multibillion bailouts for two of Amerand the Financial Corporation of

America in Los Angeles.

Washington's insouciance raises at least three dangers. First there is the inequity between the small institutions, where deposits are legally guar-anteed only up to \$100,000, and the big institutions like First RepublicBank and FCA, where the safety net appears to have been extended without limit, on the grounds that their insolvency would endeavour the US financial would endanger the US financial system as a whole.

This inequity matters, since the preservation of small banks is seen as an important policy objective in the US. While fragentation of the banking system has been partly responsible for the extreme fragility of so many banks, it may also belp to explain the extraordinary dynamism of small businesses in the US.

#### Moral bazard

The second, and more serious, objection to the implicit extension of deposit insurance is "moral hazard." Depositors who enjoy government protection have no incentive to put their savings in an institution with prudent lending policies. Instead they will tend to chase the high-est interest rate available, and this is likely to be offered by the bank or thrift which takes the biggest risks with its loans. In normal times, this moral hazard may not be important because banks stand to lose their shareholders' equity as well as their depositors' money if their lending

"A BILLION HERE, a billion than before, since the new losse there – and pretty soon you're are borne by the deposit insurtalking big money." The import are funds. That this moral hazof this comment about the US and is not merely a theoretical Government's carefree attitude to budgets seems to have been forout by the disasters in the US gotten in the past week or two. thrift industry. In addition to the Barely an eyebrow was raised in glant FCA, hundreds of other Comment left was the result. thrift institutions around the country are already insolvent ica's biggest financial institutions after a government-insured bor-First RepublicBank in Dallas rowing and lending binge which followed the deregulation of interest rates in 1980.

#### Taken for granted

The financial consequences will cost astronomical sums to clear up. In Texas alone, the Federal Savings and Loan Insurance Corporation will spend at least \$7bn reorganising 143 thrifts. Estimates of refinancing the thrift industry in the country as a whole range from \$25bn to 55bn and up. This leads to the third, and

most fundamental worry aroused by last week's bailouts. The US now takes bank failures so much for granted that nobody is even trying to search for scapegoats. In the First RepublicBank case in particular, there has been very little criticism of the regulators who permitted the merger of InterFirst and Republic to go ahead last year. The bank's manent has not been replaced and policy-makers are all too willing to excuse its failure on the grounds that the Texas economy is in recession and practi-cally every other bank in the state is on the brink of collapse. Banks should not fall, even in recessions, even when property values collapse or commodity prices fall. Every major bank fal-ure must be seen as a serious indictment not only of a bank's managers but also of the regula-tors who allowed their imprudence to run its course. The best way to bring some discipline back into the US financial system would be to allow large deposipolicies go wrong. The problem tors in a major bank to incur becomes extremely acute, however, if shareholders' funds have to imagine in the current post-already been imperilled, or even wiped out, by the excesses of the also be intensified, especially if Bank managers then have banking companies are allowed nothing to lose by gambling government-guaranteed money on the such as securities trading. If saver more speculative lending. If banks go on failing, managers, ernment-guaranteed money on ever more speculative lending. ### **Escalation** in the Gulf

MR Javier Perez de Cuellar, the The Soviet Union appeared United Nations Secretary Genslowly to be coming round to eral, said earlier this week that he was "appalled" by the recent escalation in the Gulf war, and

with good reason.
At the turn of the year, there seemed to be at least a glimmer of a chance that the international fraq's actions in the last few effort to halt this futile conflict might begin to bear fruit — either in drawn-out talks on the ing missiles at Iranian cities and nentation of the UN Security Council's ceasefire call (resolution 598), or in a follow-up reso-

nts in the last few weeks have left these hopes, and a good deal of the credibility which the Security Council appeared to have rediscovered last year, in

Iran and Iraq have been raining missiles on each others' cities. The "tanker war" contin-ues unabated. Most recently, there has been an upsurge of hos-tilities in the Kurdish area of north-eastern Iraq; Iran has cap-tured mountainous chunks of Iraqi territory and Iraq has, by all accounts, gruesomely responded by bombing occupied areas with chemical weapons.

#### Out of control

In short, the war is once again raging out of control with a brutality matched only by its sense-lessness. Despite heavy loss of life, none of the fronts on which the conflict is currently being fought has much strategic significance. Each side is merely trying to wear the other down and has precious little prospect of suc-

One main casualty of the fighting has been diplomacy. There is no immediate prospect of fresh negotiations, or of a follow-up resolution. Although both Iran and Iraq bear some responsibility for this sorry state of affairs, it is hard not to conclude that a disproportionate share of the blame rests with Baghdad.

In the second half of last year, the Iraqis were in an enviable political position. International opinion was squarely behind them in calling for an end to the conflict and in identifying Iran as the principal obstacle to peace July, if necessary by considering and freedom of Gulf navigation.

supporting an arms embargo against Iran Given his accep-tance of resolution 598, the over-all impression was that President Saddam Hussein had justice on

attacking more Iranian tankers. it has if anything stiffened Iran's resolve. It has allowed the Soviet lution mandeting an embargo on Union to back away from enforce arms sales to the recalcitrant ment measures and strengthened the hand of other members of the Security Council who favoured a more even-handed approach

is outlawed by international convention. Iraq has been at pains to deny that it was responsible for the horrifying scenes of death by poisoning on display this week in the Kurdish town of Halabja. But Baghdad has been found guilty on previous occasions of using lethal chemicals in the Gulf war despite vehement denials. To dis-Cuellar should urgently send a
UN inspection team to the area.
The question remains: why has
Iraq chosen to escalate the war to
its current pitch at the expense of tration.

The question remains: why has
Iraq chosen to escalate the war to
its current pitch at the expense of tration. its current pitch at the expense of so much political capital? It was, after all, under no particular pressure on land since the Iranians had failed to launch their part-own long-threatened new offensive on the southern battlefront.

Baghdad's perception that the world was not moving fast enough to punish Iran for its fail-

now to prove this theory wrong and show that it wants an end to the war as badly as it did last

#### Horrifying scenes

Then there is the issue of chemical weapons, use of which

The answer appears to lie in income and ex-first Boston, both at As Lilley had argued in a Bow the control resolution 598, and the centre of constant press spectral the land war was actually winding down. Iraq fears a dees and back-stabling.

Martin Dickson on today's Lonrho AGM and its larger-than-life chief executive, "Tiny" Rowland

### Idol of the small investor

THEY WILL GATHER in their hundreds from across England to pay homage to the great man; some will press forward humbly to the rostrum, to solicit his autograph or shake his sun-tanned hand; others will be content with a flash of teeth from that charming, if somewhat crocodile smile. The charismatic qualities of a suc-

cessful politician or matinee idol are not common among British business leaders, but Mr Roland "Tiny" Row-land, chief executive of Lourho, has them in plenty. And his remarkable hold over Lourho's loyal army of small investors will be on full display today at the company's annual meeting in

The AGMs of most large British companies are ill-attended, unimaginative and extremely boring, but Lourho's has a certain style. First comes a film which lends a touch of the epic to its activities: gold mines in Zimbahwe, wine-making in Bordeaux, hotels in Mexico . . . the images fly past. Then there is an uplifting speech from that most silkily urbane of chairmen, Sir Edward du Cann. And finally, a chance to meet the management over an agree. to meet the management over an agree able glass of Lourho whisky.

But this year the script will be a little different. For one thing, there may be some aggressive questions about Lon-rho's long-controversial accounting methods from dissident shareholders associated with Mr Rowland's great enemy, the Egyptian Al-Fayed family, which three years ago won control of House of Fraser, the stores group which includes Harrods, from under the nose

More important than that, Mr Row-More important than that, Mr Row-land has reached 70, an age at which he must stand for re-election to the board. The poll is a mere formality, but the milestone raises a crucial issue for shareholders: how long does the man who built Lourho up from an obscure Rhodesian company intend to carry on? Many City analysts would add a fur-Many City analysts would aid a fur-ther question: just where is Lonrho heading? Or, to put it more bluntly, has the long and ultimately unsuccessful siege of House of Fraser sapped the stege of House of Fraser sapped the company's energy, leaving it embittered and obsessed by the Al-Fayeds? Indeed, despite healthily rising profits over the past few years, there has even been speculation that a break-up hid might be launched for the group.

The ultimate answers to both questions lie inside Mr Rowland's head, for his personality dominates Lourbo in a

his personality dominates Lourho in a manner unmatched in a British company of such size. The elusive chief executive, who shuns the national press (apart from the Lonrho-owned Observer, which faithfully trumpets the company's attacks on the Al-Fayeds) could not find time to be interviewed by the FT.

Yet all the indications are that he is

Yet all the indications are that he is intent on leading the group for years to come . "Lourho is his life," says one insider. " He's never going to give it up." Despite periodic rumours of ill-health, he leads a remarkably energetic existence, flying around the world in the Lourho Gulfstream jet, clinching a deal here, parleying with a President there. "He likes being the merchant statesman, bestriding the world," says one City analyst.

one City analyst.

The acid test is what all this means for Lourho's profits and earnings. Here the record is mixed. In the first 15 years after Mr Rowland joined what was then pany's growth was remarkable, with pre-tax profits rising from £200,000 in 1961 to £92m in 1976 as it expanded across the African continent with a hectic round of acquisitions.

But there was a negative side. From the first, Lourho was enveloped in con-

troversy, stemming both from its head-long expansion and Mr Rowland's mav-erick style. All this came to a head in the early 1970s when it suffered a severe liquidity crisis, followed by a bitter boardroom battle between Mr Rowland and dissidents who tried to

The 1970s also saw a shift of strategic emphasis, as the group began expand-ing outside Africa, notably in Britsin. In 1977 it acquired its first stake in House of Fraser, starting a siege of that company which led to repeated govern-

It is from the late 1970s that the financial record becomes more uneven:
Earnings per share, which reached a
record 19.9p in 1976, fell to 6.3p in 1982,
and only surpassed the previous peak
in 1985, before sweeping up to 30.1p last
year. Admittedly, much of this gyration
was due to commodity cycle factors
beyond the company's control: the
Nigarian oil boom of the mid-1970s gave
its performance a lensified boost while its performance a lopaded boost, while the alump in platimum and gold and sugar prices in the early 1980s then pulled it down hard.

Analysis are generally agreed that if Lonrho had not been blocked by the Monopolies Commission in 1981 from Monopoles Commission in 1981 from swallowing House of Fraser, it would have got a very good buy, which would have greatly improved the quality of its enumings. "If Rowland had got control of House of Fraser," says Mr Bob Carpenter, an analyst at brokers Kitkat & Aitken, "he would have been seen as a been, the chap who saw the opportunity hero, the chap who saw the opportunity in the British high street long before Halpern, Conran and Hanson."

The fact is that he did not win, in no

small measure because of Lommo's pen-chant for rubbing the British establish-ment up the wrong way. Indeed, one of the greatest of the paradoxes which surround Mr Rowland is the fact that his extraordinary diplomatic skills in Africa seem to desert him in the dank (and he would probably say hypocriti-

cal) air of Britain.

The group has never entirely shrugged of Mr Edward Heath's phrase, apropos the 1973 boardroom row over salaries and expenses, that this was the "unacceptable face of capitalism", nor the subsequent government inquiry, published in 1976, which was highly critical of many aspects of Lourho's

Suspicion of the group must have played a role in the 1981 referral to the Monopolies Commission, which blocked a bid for House of Fraser on the

Lonrho has always been a deal-driven company. Its investors are backing Tiny Rowland's eye for a bargain

grounds that this would strain Lontho's management and be a risk to the efficiency of Britain's biggest department store chain.

Yet just over three years later - and against the background of a much more against the background of a much more laissez-faire government attitude to hids—the commission changed its mind and said Lourho could bid. By then Lourho had shot itself in the foot, selling its 29.9 per cent HOF stake to the Alfayeda, whom the Government did not see fit to put through the hoops of a Monopodies inouity.

Monopolies inquiry.

Mr Rowland's refusal to play cricket according to the British rules is underlined by the campaign he has waged since then against the Al-Fayeds, allegthe basis of false information about their financial position – a claim they consistently deny. But his relentless tirade of vitriolic abuse has produced results, in the form of a Department of Trade inquiry into all aspects of the

tigation, House of Fraser seems lost to Lourho for ever. The Al-Fayeds would hardly sell it to their enemy, while Lon-tho appears far less interested in this much-changed business, particularly now the 1980s retailing boom is proba-

That being so, just where is Lourho heading? "The company's problem in the City," says one leading analyst scathingly, "is that it does not appear to have any coherent, discernible strature."

Such a sweeping judgment is not entirely fair. For one thing, Lonrho has always been essentially a deal-driven, entrepreneurial company. Those who invest in it are in large measure backing Tiny Rowland's eye for a bargain, rather than any fancy business school theories about corporate goals.

At the same time, there does seem to

theories about corporate goals.

At the same time, there does seem to be a strategy of sorts, though what this obsessively secretive company has revealed of it so far looks distinctly hundrum when set alongside the high drama of the fight for House of Fraser. First, it has taken a significant step into the oil industry, investing while crude prices have been low in the expectation of an eventual upturn. In 1976 it set mean eventual upturn. In 1976 it set up a new joint company with Mr Robert Anderson, the former chair-man of Atlantic Richfield, which has since merged with Pauley Petroleum, a small, integrated US off company. Much more could be afoot in this field There have been rumours, on which Lonrho declines to comment, of negotiations over oil in the Middle East, and in particular a large barter deal with

Indeed, politically isolated Iran which Mr Rowland is known to have visited last year, could turn out to have a large role in his ambitions. Another link would be forged with that country if Lonrho goes ahead with current negotiations to buy half of Krupp Han-del, the large West German trading

house, since the Iranian Government has a long-standing 25 per cent stake in

Krupp's parent.
Second, efforts continue to diversify away from Africa, which still account for some 50 per cent of group profits.

The oil and Krupp Handel deals are part of a build-up of resources in the US and West Germany. In the Far East, Lonhro has formed an unusual joint venture with a large Japanese trading house Nissho Iwai. However, this has yet to produce results and critics say Lourho has been far too late in seizing the opportunities of the Pacific rim. Third, it is expanding its existing

businesses both through capital investment and add-on acquisitions: for example, a large new wing is being built at its Metropole hotel in London, while last year, in a very well-priced deal, it bought out its minority partner in Western Platinum, the South African mining house which is one of its most lucrative operations. However, its acquisition of Today newspaper was not a success and it sold the business after less than a year of heavy losses.

The 1980s have also seen a substan-tial strengthening of management structure and there now seems general agreement among analysts that at operational level the company is well run. Like many conglomerates, it operates a highly decentralised system, with the business divided into 34 management regions, each responsible for its own profitability, while the centre exerts control through a strict monthly finan-

control through a strict mainthy man-cial reporting regime.

But there is still concern in the City over the balance of power at the top. The 1976 DTI inquiry made clear that Mr Rowland totally dominated the Lou-rho board — he likened fellow directors to "sort of Christmas tree decorations."
The greater complexity of the business may have shifted the balance in favour of other executives, but they do not come across in public as particularly forceful figures and there are no nonexecutive directors on the board who might provide an independent voice.

All this may work to the shareholder's benefit while Mr Rowland comes up with good deals, but a lopsided board would be another matter if he lost his touch.

As for a break-up bid, this seems unlikely in the short term. City analysts currently estimate the net asset value of the business at around 450p a vame of the business at around app a share, compared to last night's closing share price of 251½p. But Lonrho's African interests would be of question-able value without Mr Rowland's diplomatic skills, while several of its impormatic skills, while several of its impor-tant assets are in joint ventures, which could be hard to unlock. Uncertainty also surrounds the fate of one of its biggest UK profit earners — VAG, the importer of Audi and Volkswagen cars, following news that Volkswagen has taken a step which might lead it to acquire eventual control

Furthermore, few predators would relish the idea of a no-holds barred contest with Mr Rowland, who anyway owns some 15 per cent of the equity and has his loyal band of small inves-

The immediate profits outlook is also uncertain and depends considerably on the price of platinum. Last year it enjoyed a rise of more than 20 per cent. £200.2m pretax, but City estimates for this year range from as low as £174.5m up to £215m — respectable but

Perhaps Mr Rowland has new deals up his sleeve, to show that he can still swim ahead of the tide of business history, and to confound critics who say he has lost a retailing empire but not yet found a role which measures up to his outsize personality.

#### POLITICS TODAY: by Joe Rogaly

### What Britain can do about Ireland

problem of Northern Ireland. There just may be a long-term one, if the British Prime Minister takes it seriously enough. This is plain if you re-examine the pieces of the puzzle, as most of us outside the unhappy province have to do each time there is a resurgence in ence terrible enough to refocus our violence terrible enough to refocus our constantly wandering attention upon it. The awful scenes on our television screens last week, particularly those in which two young British soldiers were murdered by a bloodthirsty mob, have been exceptionally shocking, and have thus had an exceptional effect upon the British consciousness. Let us, therefore, look again for a road to peace.

look again for a road to peace.

In Britain, three possibilities have been widely discussed by politicians and the saloon-bar public alike over the past few weeks. The first is the withdrawal of the British Army from Northern beland with only a sour custom. ern Ireland, with only a sour curse on both sides as a parting gift. The second is the very reverse: an intensification of the campaign against paramilitary organisations in both communities, aided by such devices as internment, the re-introduction of capital punishment and the determined use of killer commandos such as the SAS. The third is to persist with efforts to defeat the IRA and its Protestant counterparts, while working with the hish Govern-ment as the significance of the border between north and south is eroded. Call these options "troops out", "troops in",

we can dismiss the first quite quickly. Some isolated Labour politicians and a great many on the extreme left of British politics support "troops out", but the idea does not stand up to examination. It suffers from the initial (and to me over-riding) disadvantage that it would constitute a vindication of the IRA strategy of terrorist violence -but, even for those who could swallow it has a further, fatal, flaw. It would not end the violence, but intensify it. On this matter there is a chilling near-unanimity among British politicians with a close acquaintance with Northern Ireland.

What they say is that, in the absence of a British military force, the Protes-tant paramilitary organisations would seek to restore the Unionist ascendancy. There would be political mur-ders, revenge murders and virtual civil war. The locally recruited police and defence forces, which have been built up as a means of reducing the front-line activities of the British Army, would doubtless involve themselves.

The minority Catholic population could not win such a battle on its own.

Co-operation between Washington and London on security would be under severe strain; one consequence might severe strain; one consequence might be that "volunteers" from the Irish community in the US would come over to join the fray. (If you have eyer sat through a night's patriotic singing in one of New York's Irish hars you will find this easy to believe.) As one British minister said this week, "you would have the Spanish civil war replayed on our doorstep." Some people doubt that the loyalists would start such an afray, but the risk is not worth contemplating.

So what, then, about "troops in"? This would attract strong support from many people in Britain, not least those on the Conservative back benches who

have been muttering all week about the desirability of "going in there and sort-ing them out." But this, too, would not work. The last time internment was introduced, in 1971, violence increased sharply. There was an international outcry. Support for the IRA was proba-bly strengthened. Again, capital punishment would produce martyrs, upon which organisations like the IRA thrive. Some of the Tories who support capital punishment in general have been heard to say, "but of course not in Northern Ireland."

salon-bar conversations, that this is all very well but that if the British forces were unleashed they could wipe out the men of violence. People who take this view express little disquiet at allegations that there was a "shoot-to-kill" policy at the start of the decade, or that something very like such a policy was in use in Gibraliar when the three

It may be objected, particularly in

trouble with this line of thinking is that we live in a democracy. One important difference between the IRA and the British Government is that the latter stands for the rule of law. In our society, assassinations of doubtful-legality raise more questions than they-answer. They breed further hostility against the British. Seriously "wining out" an enemy requires the callonaness of a Stalin, a Hitler, or a Pol Pot.

We are therefore left with the third option, which is "containment-plus". The recent series of awful events may lead some people to think that the containment side of this policy is not working. In fact, as the table shows, the number of violent deaths has been number of violent deaths has been brought under a sort of control over the past decade. The sharp increase in the number of people injured over the past couple of years, and the increase in civilian deafhs last year, is ascribed by Unionists to the Anglo-Irish Agreement which reasoning the sharp decade in Newsphere. ment, which was signed in November 1985. I will come to that agreement in a moment, but first it should be recognised that a great deal of the killing and counter-killing has taken place between the security forces and their insurgent opponents, or between paramilitary factions. The Provisional IRA contains some of the most sophisticated contains some of the most sophisticated terrorists in western Europe; increasingly they have been matched, and out-matched, by British intelligence. Examples of the results were seen in May 1987, when eight IRA men, and a passing motorist, were killed in an ambash at Loughgall police station—and, again, in Gibratiar the other day.

The plus side of "containment-plus"

The plus side of "containment-pl is the Anglo-Irish Agreement, which is as important for its psychological impact as for what it says. It acknowledges the existence of international concern for the affairs of the province, first because it has been registered at the United Nations and, second, because it provides for continual consultation with the Republic of Ireland. Britain retains sovereignty, but it cannot be said to be undiluted.

To some British politicians the long-term purpose of the agreement is to prepare for the day when the people of Northern Ireland have been persuaded to vote for a transfer of sover-eignty from London to Dublin. This is not the view of the Prime Minister or of her several Secretaries of State for Northern Ireland, The Ulster Protestants may be exasperating, but the Con-servatives would not accept a strategy lling them down the Liffey.

The purposes of the agreement are first, to remove the sting of interna tional pressure and, second, to persuade the Protestant community that it

must come to some kind of political understanding with the Catholics if its future is to be secure. The first purpose has been met. President Reagan has recognised the significance of the agreement, as has the European Com-munity. It could also be argued that the issue of the border has been defused. its significance will be further eroded in 1992, when the EC abolishes internal customs posts and establishes a single economic regime. The Irish Govern-ment for its part has had to accept responsibilities.

As to the second purpose, a forthcom-ing book, Northern Ireland since 1968, by Paul Arthur and Keith Jeffery, (Basil Blackwell/institute of Contemporary British History) suggests that progress is being made. "The loyalists," say the authors, "are still out in the cold and, indeed, are in some disarray. But there appears to be a slow Unionist realisation that old methods and old cliches are no longer relevant. In short, the Angio-Irish Agreement has at least made that psychological break-through." We can already see results. For example, the contribution of the formerly flery Unionist Mr Peter Robinson to Monday afternoon's debate in the Monday afternoon's debate in the House of Commons was noteworthy for its tone of moderation.

for its tone of moderation.
It is plainly necessary for the British Government to tread with great delicacy on these new-laid eggs. Lean too hard towards Dublin, and the old Protestant fears of a "United Ireland" are rekindled. Allow too many events that seem like anti-Catholic outrages to pile up, and the local political pressure on the Irish Government to dilute the sig-

nificance of the agreement is intensi-fied. For this reason, the ministers and fied. For this reason, the ministers and permanent secretaries at the Foreign Office, the Home Office, the Northern Ireland Office, Defence and the Treasury have been persuaded, over the past few weeks, of the desirability of introducing an "Irish dimension" into the review of new Government policies. There is just such an internal under-There is just such an internal under standing in Whitehall over the "Euro pean dimension" — how will this play-in Brussels? Now a new question has been added: "How will it play in Dublin and Belfast?" It is not more than a

century or so late.

The Cabinet Office will, of course, co-ordinate this effort. What is missing is the necessary degree of attention from the Prime Minister, Mrs Margaret Thatcher, herself. She concentrates on Northern Ireland when its costs are placed before her, or when British sol-diers are murdered. Beyond that, she simply does not have the time to main-tain so delicate an operation as the Anglo-Irish Agreemen

One way out might be to place the Cabinet committee for Overseas Affairs (Ireland) under the stewardship of Sir Geoffrey Howe - or, if it is thought that he is out of the country too often, inder the Home Secretary, Mr Douglas Hurd (himself a former Northern Ireland Secretary). Either of these would nurture the "containment-plus" policy in London while Mr Tom King, the Northern Ireland Secretary, builds his relationship with the Irish Deputy Prime Minister in Dublin. Such concen tration on the agreement is a slender

### The conifers go marching on

By Bridget Bloom

BRITAIN's forestry policy has come under unprecedented attack over the past year. There has been weighty criticism of the economic viability of government assisted planting from the National Audit Office, the gov-ernment's independent auditor, and from the Public Accounts Committee of the House of Commons. At the same time, all the major conservation groups have questioned the environmental mpact of serried ranks of conifers marching across heather moors and hills.

So there was great interest when it was announced in last week's budget that tax incentives for the rich, which had encouraged confer planting in marginal lands like the Flow Country in northern Scotland, were to be abolished and a new system of grants devised. From the way
government ministers talked in
the week it took for details of the
grants to be published, it seemed

ABS DEEN MINISTER IN INCIDENT

evidence, for example, that the
return will allow the Forthe week it took for details of the
grants to be published, it seemed
as though a new era in forestry

PAC that the returns on public

Sadly, this is not the case. The tax incentives have been replaced by much bigger grants for plant-ing both conifer and broadleaved trees, but otherwise the policy mix is distressingly similar to what went before.

It has not, of course, been publicly presented like that. To meet the criticism that too many conifers have been planted in the past, there will be more grants for broadleaved trees and for planting mixed woods, while there will be a virtual ban on planting conifers in the English But Sir David Montgomery,

Chairman of the Forestry Com-mission which implements forestry policy, let the cat out of the bag when he confirmed on Wednesday that conifer plantations must continue to be established in Scotland and Wales to meet the Government's unchanged target of 33,000 hect-ares of new forest each year. And he confirmed that the new grants which actually involve com-paratively higher increases in grants for planting large acreages of conifers than of broadleaved trees - have been set at levels

which would make such planting

still attractive to the private investors who are responsible for three-quarters of today's forest

That is not all bad: Britain is underforested compared to Germany or France, and manages to produce only 9 per cent of the timber requirements for an expanding processing industry. Environmentally, the guidelines accompanying the new grants, being more precise, should encourage more sensitive planting. The new grants may well encourage farmers and local landowners, as distinct from the absentee rich, to establish new

But it is hard to avoid the conclusion that a real opportunity to produce a more relevant and publicly acceptable forestry policy has been missed. There is little costs of creating jobs in forestry is too high. There is virtually no change in the rules governing the adjudication of complaints from the public of insensitive planting. This despite the fact that the Scottish Local Authorities Assobodies, including quangos like the Countryside Commission, have called for greater transpar-ency in consultation procedures. Mr Malcolm Rifkind, Scottish Secretary and informally the lead minister on forestry, has repeated that planting in the important parts of the Flow Country will go on.

The Forestry Commission itself is partly responsible for this missed opportunity, for it has often been bureaucratic, secretive and resistant to change. But the chief culprits must be the several ministers responsible for forestry, who apart from the Scottish Secretary, also include the Minister of Agriculture, the Secretary of State for the Environment as well as the Welsh secretary. It is they who collectively have failed to realise that more is necessary to make forestry policy publicly acceptable than just the abolition of a few unpopular tax

#### Employees take share risks too

From Mr D.R. Singh. Sir, I am fascinated by the col-umn inches that have been devoted to the "giveaway" Budget proposed last week by the

My circumstances are reasonably straightforward and, with one exception, are likely to be similar to many others in the country. After taking into account the married man's allowance, interest on the maximum allowable £30,000 mortgage, and a qualifying loan for buying shares No such thing as a in an employee-controlled com-pany (offset by the car, fuel and private health disallowances), the drop in my marginal rate of tex from Miss Sue Harve from 55 per cent to 40 per cent Sir, How can Mr N leaves me approximately £450

On the other hand, the raising

of capital gains tax (CGT) to 40 per cent is going to cost a very significant additional amount when the value of the shares in my company (which underwent a management-led employee buyout last year) is - I hope - realised in the future. One would have thought that the Chancellor might at least have proposed a lower rate for the risk involved in inculcating an enterprise culture which involves employees.

D.R. Singh. Trevose, 23 Lickey Square, Barnt Green.

#### Bonus should now be 'rationalised'

From Mr Kenneth Gough.
Sir, Since Mr Lawson's Budget
has given board directors and senior executives a large increase

in net pay, can I now assume that this bonus will be "rationalised" for the benefit of sharehold ers by an immediate reduction in executives' gross pay and perks? K. Gough, 40 Grafion Square, SW4

### fairly-taxed lunch

Sir, How can Mr Nigel Lawson have cut out tax-exempt business lunches for foreigners but ignored a far bigger culinary anomaly closer to home - the different tax treatment of employees' meal allowances in large and small firms?
Meals served in staff canteens

are provided tax free, an effective average tax allowance of £1.50 per day. Luncheon vouchers used by employees in small busi- have a tax exemption of just 15 pence a day, a figure unchanged for 40 years.

The canteen tax allowance

costs the exchequer several hundred million; the meal voucher allowance, 25m. Surely it is right to balance these figures out? Mr Lawson likes to tackle unfair and unequal tax treat-

ment. It is a comparatively small matter, but modernising the meal voucher figure would be the right move for a reforming Chancellor, and be popular with Britain's rapidly growing small business

#### New CGT base date suits the Treasury

From Mr Michael Lener Sir, Contrary to Lex (March

Sir, Contrary to Lex (March 19), it is my opinion that only the naïve will jump at the chance to realise capital gains on properly holdings — but as it seems to be the way many people are thinking, I sense they will fall into Mr Nigel Lawson's little trap.

Capital gains tax (CGT) is only payable when an asset is sold. The 1968 hase date has acted as a districtive for releasing sain

disincentive for releasing gain, which has led to an enormous accumulation of untaxable wealth, and has also provided an excellent collateral base for secoring finance

There are two clear advantages to the Treasury in altering the valuation base date to 1982.

First, it simplifies the Inland Revenue's task of agreeing values with the taxpayer. Second, it invites investors actively to sell; this extracts the tax, instead of allowing it to remain inaccessi-Although there has clearly

been growth between 1965 and 1962, the current level of values has only been around for a few years. If the Chancellor is able to exchange the "loss-making" cost of collecting 30 per cent CGT revenue for a highly profitable 40 per cent share in current prices. then his politically acceptable wealth tax will more than com-pensate for a reduction in top

olution. Tax rates, indirect taxes

prise society and - dare one say

#### Labour will produce an alternative

Proof Mr John Willman. Sir, Your editorial on the Opposition's response to Mr Lawson's Budget (March 17) suggests that Labour needs fundamentally to se its taxation policies.

One of the seven groups in Labour's Policy Review is concentrating on taxation and eco-nomic equality. The Fahian Soci-ety is funding an important review of the whole field of taxa-tion as a contribution towards. that process; it will analyse changes since 1979 and look at developments elsewhere (including Australia and New

To carry through such a fundamental reassessment requires considerable time and resources. It is hardly fair, therefore, to criticise Labour for being unable to produce a fully formed alternative to the Chancellor's radical restructuring at the drop of a hat. John Willin

### Israeli dissident convicted of espionage

MR MORDECHAI VANUNU, the former nuclear technician who told a British newspaper that Israel had been develop ing nuclear weapons for two decades, is expected to be sen-tenced on Sunday to life in jail, writes Andrew Whitley

Yesterday, at the end of a seven-month trial held entirely behind closed doors and amid tight security, a three-judge bench found the 84-year-old dissident guilty on all three charges: treason, aggravated espionage and the unauthorised transfer of information.

Mr Vanunu was kidnapped abroad by the Mossad, the external intelligence service,

in September 1986 and brought back to Israel. This was shortly after his disclosures about Israel's previously unconfirmed nuclear capability were published by the London Sunday Times.

in keeping with the rest of the proceedings, only one sen-tence of the 60-page verdict was made public the fact that Mr Vanunu had been found gailty. Nor was there any word from the defendant himself. hostled away in a van with its windows blacked out to prevent him communicating with

Mr Avigdor Feldman, the left-wing defence lawyer, had tried unsuccessfully to per-

suade the court to throw out the charges on the grounds that his client's forced repatriation to Israel constituted a miscarriage of justice. However, an appeal to the Supreme Court is considered almost cer-

Mr Vanunu is believed to have insisted throughout his case that he was acting out of ideological motives, with the aim of sparking a debate in Israel and abroad over the morality of nuclear weapons. But the authorities argued that he had told his story about his nine years at the top-secret Dimona nuclear facility in the Negev for

Andrew Gowers and Andrew Whitley report on a spy case that affects military strategy

### Israel's nuclear myth exploded

satisfaction. For the secrets the former Israeli nuclear technician leaked to the Sunday Times in 1986 and the publicity surround-ing his subsequent kidnapping and trial have severely dented the Israeli Government's public posture over its alleged nuclear capons capabilities.

Ever since speculation about the existence of an Israeli "bomb nearby underground factory in the basement" began, the Government has wheeled out the pat ucing components for the manuanswer provided by Mr Yitzhak facture of nuclear arms at Rabin, now the country's Defence Minister, in 1974: "Terest 1.2" be the first country to introduce nuclear weapons into the Middle

Most observers take this statement to be as good as meaningless, since it is widely believed that the US and Soviet Union made the first such move in the region by carrying nuclear was region by carrying nuclear war-heads on their ships in the Medi-

But the statement at least had the merit of calculated ambiguthe ment of calculated amingu-ity, serving in itself as a deter-rent and a device to keep Israel's Arab enemies — some of whom are themselves thought to be try-ing to develop nuclear capabili-ties — off balance.

It allowed Israel to maintain its emphasis on conventional defence, but left neighbouring states in no doubt that if nuclear weapons were in the region already, Israel could not afford to be far behind.

Just as important, it has helped to keep international advocates of nuclear non-proliferation – and especially Israel's reactor – fuelled with natural ally, the US – from asking too uranium and moderated and many awkward questions. Israel cooled by heavy water – was

give evidence on Wednesday.

to clarify

WHEN Mordechai Vanunu begins for discussions on a comprehensive official jail sentence for esplonage and treason on Sunday, he will have at least one reason for establishments to international inspection.

Mr Vanunu's revelations went some way to disturb this balancing act. They were the first detailed public disclosures to come from inside Dimona, the secretive nuclear research estab-lishment in the Negev desert

where he worked for 10 years.
He told the Sunday Times of a dence, independent nuclear scientists reckoned at the time that

gist of his disclosures — the exis-tence of a sizeable Israeli nuclear deterrent - has never been in

Last October, a United Nations report quoted several factors that "conveyed the strong impression that Israel does have the capacity to produce nuclear weapons."

Israel's interest in things nuclear dates back to the founding of the state in 1948. But the development of a military nuclear option probably began in earnest in the mid-1950s with the decision to build a large reactor without international safeguards

blocks.

According to the memoirs of French President Charles de Gaulle, who signed the deal in 1956, the plant came with "an installation to transform ura-nium into plutonium . . . from which, one day, atomic bombs

might be produced."

The heavy water - 21 tonnes of it - came from Norway in the 1960s and 1970s, and is still a subject of controversy between the Norwegians and the Israelis. Uranium could be picked up from the spot market, and quite probably from South Africa, with which Israel has conducted extensive military co-operation.

With those ingredients - and heaps of Israeli expertise - in place, producing a bomb would have been a relatively simple matter. Delivery systems, in the form of surface-to-surface missiles or aircraft, were no problem either. Last July, for example, Israel is reported to have tested an upgraded version of its nucle-

already been tested. But they say it would be theoretically possible for Israel to have developed methods such as computer simu-lations to ensure that its bomb

It is easy to see why Israel thought it needed to develop the bomb, encircled as it feels itself to be by hostile neighbours. Some of these - Iraq, say, and Libya, not to mention Pakistan - are themselves believed to have nuclear ambitions. Israeli public opinion solidly backs maintaining a deterrent, insofar as the issue is discussed at all, which is what made Mr Vanunu such an

But many independent observ-ers find the existence of nuclear weapons in as volatile a region as the Middle East deeply disturb-ing. There is also widespread concern, albeit never officially expressed where it counts - in Washington - that the international community has no "han-dle" on the Israeli bomb through the usual safeguards or inspec-tion procedures.

To remedy this problem, some respected experts suggest bring-ing the Israeli deterrent into the open in order to minimise its destabilising potential; or negoti-ating a freeze in its development. In 1980, the Israelis themselves proposed negotiations on a nucle-ar-free zone in the Middle East, though since this entailed Arabs holding face-to-face talks with Israel it never stood a chance.

In Israel itself, some influential either. Last July, for example, voices have called in the past for the development of a declared an upgraded version of its nuclear strategy. ### The wrong mood for rights

The market's near 50-point col-lapse yesterday is a puzzle, but not necessarily a disaster. In FT~SE 100 Index purely domestic terms, the mar-ket had been ploughing to a halt throughout the week, and the last thing it wanted was a series last thing it wanted was a series of rights issues culminating with Lucas. On a wider front, London seems correctly to have anticipated the downturn on Wall Street, which was itself an overdue reaction to a half-point rise in bond yields. These in turn had clearly been too low; for besides rising oil and commodity prices. rising oil and commodity prices, which Japanese investor would settle for a return of 3 per cent in real terms in the US when 5 per cent is on offer in Europe?

that London, which for a fort-night and more has been mes-merised by sterling, took not the slightest notice yesterday when it dropped below DM3.10. But yes-terday was classically a day for that a number of other grand old names of British industry are queuing up for money.

Given the fragile state of confi-dence, it would have been prefer-able if Lucas's cash call had coin-ded with a circular conviction. fund managers to keep their heads down; not only had the FT-SE gone back through 1800 cided with a sizeable acquisition. Then at least it would have been

There was irony in the fact

**Lucas Industries** 

Lucas deserves a bravery

with the first big rights issue since the October crash. A year

ago it would have scarcely rated a mention, but its £163m cash call is a very hefty figure by today's standards; and despite its recent recovery, Lucas is not the

sort of glamorous name which demands immediate respect. It has spent almost all of the money

it raised from its previous sub-stantial rights issue – little more

possible to assess the wisdom of and in such markets, round num-bers have a superstitious power the strategy, rather than having to entrust so much money to a management team which has still to prove that it can transform Lucas into a world class com-pany. All of the one third rise in - but no one goes home long of stock when Wall Street is down 40 points and may be en route to heaven knows where.
The ultra-superstitious are muttering that the second leg of interim pre-tax profits, to £53m, can be explained by the impact of loss elimination and acquisitions, the 1929, crash started on the 155th day, and the 155th day from the October crash is today. Apart and, given the relatively low multiple of around 8 times this year's the October crash is today. Apart from the comforting reflection that the past is a long guide to the future, the market is likely to end the week in a state of real uncertainty. A three week account with a long holiday in the middle is not, after all, the best time for taking risks. earnings, it is hard to see how the company can avoid diluting next year's earnings if it makes a major US acquisition.

#### Smith & Nephew

A company which has given shareholders what they expect quarter in, quarter out for nearly a decade, disappoints at its peril. While a 24 per cent increase in full year pre-tax profits to £110m seems a blameless enough perfor-mance, the market was thunderstruck that Smith & Nephew's figures were not £3m higher, and instantly deemed the company to be worth some £135m less than before. It seems investors have decided that Smith & Nephew can no longer be depended on, and therefore does not deserve its

tions at a time when most of its major markets are slowing down.

Coming a day after Tootal's \$54m issue, there must be a suspicion

beyond its control. Even though are more scandalous tithits to it is never comforting to hear so many explanations, the extra these as opportunities to pick up costs of merging two factories, shares more cheaply again.

difficulties at its Canadian plastics business and one or two problems with the otherwise successful Richards acquisition all seem like genuine temporary dis-

More serious is what the More serious is what the squeeze on the NHS is doing to hospitals, where demand fell sharply in the fourth quarter and is showing no signs of recovery. And while the company protected itself well in 1987 from the power of the of the pound through careful hedging, exchange rates will nurt more this year. In all, earnings growth over the next year or two may be slightly closer to 15 than the 20 per cent of recent years, but given what is happening to earnings overall, that scarcely sounds like a horror story.

#### Guinness

The first full year figures from ment are clearly encouraging. The profit improvement is mea-gre, but it is remarkable that it should be there at all; it was a year not only of management upheaval, but of restructuring in the distilling business which was disruptive in itself. The fact that 75 per cent of sales now go through Guinness-controlled dis-tribution, compared with 25 per cent a year ago, is only one exam-ple of the added value being cre-ated on the distilling side; and there are plans this year to extend production and distribu-tion on the brewing side through

swaps and joint ventures.
From now on, the pressure is on Guinness to perform in profit terms as well. A pre-tax figure of £475m this year would translate into a p/e of 9 at 304p, so the market is putting below-average value on expected above-average growth. A more generous reac-tion was not to be expected on the day on which Mr Parnes was flying in from California, but it also illustrates a more fundamen-

also illustrates a more numamental division of opinion.

No-one doubts that several years of profit growth are to be had simply by freeing Distillers from its past; what is less clear is what happens then. Pessimists say Guinness runs up against the total lack of growth in the world whicher market Optimists say the superior rating.

Such a judgement would seem a little hasty. The company has produced a full catalogue of causes for the shortfall, half of which were one off and the rest when we grandly its couries for the shortfall half of which were one off and the rest who we grandly its couries for the shortfall half of which were one off and the rest who we grandly its couries for the shortfall half of the cause of the shortfall half of the shortfall half of the cause of the shortfall half of t

#### BUDGET GIVES LASER PROPERTY TRUST A MAJOR BOOST

### Last chance to shelter all your high rate tax.

Tax rates fall next year, but this year you still pay high rates at 45-60%. The LASER 1988 Trust is the tax shelter property investment that enables many investors to wipe out their entire high-rate' tax liability, for this year. Over £20m has already been invested by high rate taxpayers. The fund's maximum is £26.7m and it must close when this level is reached. Furthermore, special 50% loan facilities arranged by LASER's managers, Colegrave Johnson Fry Ltd., mean that with tax relief you

may be able to invest with no capital outlay at all. "What is the LASER 1988 Trust?". This investment product is an Enterprise Zone Property Trust. It invests in prime properties in London Docklands and other Enterprise Zones in

the South East. All are fully pre-let or have the benefit of long-term rental guarantees. "Whar's so great about LASER?" The reason that this type of investment vehicle is so special, is because it is unique in offering:

Inumediate tax relief at your top rate of income tax for approx. 95% of the investment al income distributions ● Excellent growth potential through

investment in large, well managed, quality "What is the cash flow?" The opportunity can be best illustrated by showing the cash flow derived at for 60% tax

payers as follows:

100,000 Investment Relief at 60% 56,400 43,600 NET CASH REQUIREMENT NIL 5.150 p.a.\* Est, income net of charges 4,560 p.a. £590 Loan interest at 10.5% Surpius income

The jewel in The LASER Trust's crown is

Harbour Island - a retail and commercial office development in the heart of London Docklands. Already, some six months before completion we have had offers on two thirds of the retail units which is an indication of the demand from occupying tenants.

The rentals agreed so far average 15% above the guaranteed rental yield which bodes well for future income growth. We believe that the opportunities for capital growth in the Docklands

"So what are my options?" The options are:

(1) Pay high rate tax to the Chancellor or (2) Invest in LASER, with no cash outlay and own an income-producing property asset, with good growth potential.

The Chancellor has generously reduced high-rate tax for the next financial year so, by investing in LASER now, high rare tax payers bring forward There has never been a better time for a tax

shelter like LASER. However, be quick - there is a limited number of LASER units still available and investments must be made before March

"How do I find out more?" WE ARE OPEN ALL WEEKEND. COME IN OR CALL US ON (01) 439 0924 TO DISCUSS YOUR LAST MINUTE TAX SHELTER REQUIREMENTS. THE FUND MUST CLOSE ON THE 31st MARCH.

subject to upward-only rest review expected to be sought shortly. The charges, Page 9 innocence throughout and has Mr Parnes' co-accused are awaited the opportunity to Mr Ernest Saunders, former

### WPP faces libel suit

FORMER EXECUTIVES of Lord. Geller, Federico and Einstein plan to bring a libel suit against plan to bring a libel suit against WPP, the British marketing services group, for its accusations that they tried to sabotage the New York advertising agency before they left last weekend to form their own firm

form their own firm.

Mr Thomas Schwarz, the law yer representing the new agency of Lord, Einstein, O'Neill and Partners, said: "These charges are without merit and they are scurrilous. We will be filing libel charges in the next 10 days."
After several days of colourful quotes to New York media about their new venture — "We like to

Repant said yesterday that Repant said yesterday that Repant Said yesterday that Repant Suploracion, its exploration division, had acquired a 25 per cent equity interest in Repant Occidental, a new US registered company created for the joint exploitation of the US company's assets in Colombia.

The deal sives the Snantsh Geller," one said of the new agency — the defectors turned silent yesterday, referring all calls to their lawyers as the fight assets in Coloniana.

The deal gives the Spanish group access to the Canyo Limon and Redondo fields in northern Colombia. It is the first joint with WPP became increasingly

acrimonious and litigious.

Mr Martin Sorrell, the chairman of WPP who engineered its ambitious takeover last summer of the J.W. Thompson advertising utives would pey \$22m for 55 per cent of LGFE and alternative courses if this proposal was

turned down.
The memo considers one tion." It appeared to be initialled by Mr Ed Yaconetti, the former sirman of the agency, Mr

"These people worked up to the end, even last weekend," said Mr Thomas, the defectors' lawyer. the problem is getting worse and been much speculation that – in we see no way to improve it over a "people business" this could

"They were very aware of their time. obligations." "Scenario 2. On a worst case WPP is seeking an injunction basis . . . Martin finally says

Geller's 330 employees have already switched agencies. Many of them are senior creative and account personnel, raising the possibility that Lord Geller, which handles some of WPP's biggest clients, could be months to examine our options . . . and in net . . . de-lay until 1/1/89 all substantive

wpp's biggest clients, could be severely impaired.

"They left because it became action in the LGFE... Wpp relationship. It is the opinion of this impossible for them to operate author... that while this under wpp's management recommendation may not satisfy because they no longer had the author it will no doubt had been built, Mr Schwarz said. "drive Martin bullshit... and "We have the 13th amendment have the postive effect of buying here in the US against involuntary servitude. People don't have true long-term options are." "We have the 13th amendment

to work for anyone they won't want to," he added. "They didn't solicit clients or employees up until they left. If the memo was written by (one of the defectors) none of those things WPP is complaining about, like the slowdown, hap-

Mr Sorrell said vesterday that the memo was discovered on Tuesday morning. Apparently discus alternative options to a buyout at one stage, it reads: "Opinion 3: If WPP were to reject the above

proposition . . . two probable scenarios could appear. Scenario 1: We choose to slow down the reporting process and execute a general slow-down programme throughout our Explanation to WPP: a. it is possible to enhance returns we're doing the best we can at JWT through tighter financial under the circumstances . . b. controls. However, there has

against Lord Einstein barring it uncle and we end up with a from soliciting Lord Geller's climuch improved package of goodents or employees. Some 30 of les."

Another page, under the side-heading "recommendations," reads "perhaps our best bet is to agree that we take the next 12

Yesterday in New York Mr Sor-rell added that other "pieces of light at the agency in the past couple of days, but declined to specify their nature.

Lord Geller was acquired by WPP through its ambitious 60m bid for JWT Group in July.

In financial terms, Lord, Geller is a relatively small part of JWT dwafted by its larger sister agency J. Walter Thompson. Billings are estimated at around \$200m and revenues at \$30m - out of total JWT revenues of \$700m in 1987.

However, the agency is highly regarded for its creativity and the defections are seen as a test of WPP's post-bid strategy. The British company believes

Mr Martin Sorrell:Engineere

drive clients and employees through the door.

In a spirited damage limitation exercise, WPP has already filed a legal action against the new agency formed by the former LGFE executives, against 12 former LGFE employees and against the privately owned agency the privately owned agency Young & Rubicam, which has a financial interest in the new

WPP's complaint alleges breaches of fiduciary responsibil-ity and duty of loyalty by the six executives who left on Friday.

Among its complaints on this score it alleges that the execu-tives discussed the financing for a potential leveraged buyout of Lord Geller with Dean Witter Reynolds, the New York invest-ment bank and the fourth largest client of LGFE. WPP claims that they thereby disclosed to a client that key executives were seeking to leave Lord Geller.

### Paloma Industries buys Rheem

maker of gas appliances, seems The deal will give Paloma con-poised to become the world's trol of a business with revenues leading manufacturer of water of around \$800m and access to heaters, after a deal yesterday to buy Rheem Manufacturing of ing products. #### IMPALA PLATINUM HOLDINGS LIMITED

(Incorporated in the Republic of South Africa) Reg. No. 57/01979/06

#### TO THE SHAREHOLDERS OF IMPALA PLATINUM HOLDINGS LIMITED

Legal proceedings have been instituted in the Supreme Court of Bophuthatewana against Impala Platinum Limited (the company) by the Batoleang Tribe who are the beneficial owners of part of the land on which the mining operations of the company are being conducted. The President, the Government and the Registrar General of Deeds of the Republic of Bophuthatswana are joined in the

The action has arisen out of a dispute over demands by the Batoleon Title that Impala Platinum Limited furnish certain information of a confidential nature retaining to the company's mining operations which the Title claims it is entitled to receive in terms of a cassion agreement between the company and the registered owner of the land who holds the land in trust for the Batoleon Title. In terms of that agreement the right to conduct mining operations on the land was caded to impala Platinum Limited. Such records as the company may be obliged to maintain under the agreement are open for inspection by the registered owner or his duly authorized representative only. In 1977 upon the establishment of Bophuthatswana as an independent state the President of that country became the registered owner of the land in trust for the Batoleon Ribe.

On the basis of the above and other considerations impala Platinum Limited has refused the Tribe's demands. The Minister of Economic Affairs of Bophurinatswana has directed that the company should not furnish the information unless it is instructed to do so by the Trustee. The Befokeng Tribe is disputing the authority of the President of Bophurinatswana in his capacity as Trustee and claims that the company's refusal to provide the information demanded constitutes a repudiation of the adorementioned agreement of cession.

ally opposed. Impala Platinum Limited and the co-respondents will defend the action.

Johannesburg, 24 March 1988

#### INTERNATIONAL COMPANIES AND FINANCE

Alan Friedman interviews the newly-appointed head of Montedison, the Italian chemicals group

### An American executive at the court of Raul Gardini

THE FIRST thing that strikes one on meeting Mr Alexander Giacco, the 68-year-old American who on Tuesday was named chief executive of Italy's Montedison cheminates of the first strikes one of the first strikes one on the polymers production eventually to become Giacco strategy at Montedison chairman and chief executive, is will focus heavily on the polymers product of the first strikes one on the polymers product of the first strikes one on the first product of the f

rete

chemicals company, it is clear man who leaves day to-day that he plans to work hard, enjoy affairs to others, this week flatly himself in doing so and meanwhile try to steer clear of the often internecine politics of Ital-ian big industry. But the incon-

gruities remain.

Seated behind a huge designer desk of glass and steel, in a highdesk of glass and steel, in a highceillinged octagonal room, with transparency and roughshod walls covered with an unusual artifical substance intended to resemble green suede, Mr Giacco exudes American enthusiasm for the difficult task of restructuring the difficult task of restructuring the debt-laden Montedison.

Montedison share deal which has come under heavy fire in Italy because of its alleged lack of transparency and roughshod walls covered with an unusual artifical substance intended to result of the criticism, saying that "this is the debt-laden Montedison.

jokes the man who was plucked for Italian corporate stardom by Mr Raul Gardini, head of the Ferruzzi foods group which owns 42 Mr Giacco, "is going to change."
The American industrialist says And here is the first incongru-

ity. Mr Glacco, who spent 40 has institutional investors in the years at Hercules of Willmington, US and adds that "the Wall

cals group, is the incongruity of Mr Gardini, who by appointing his situation.

Mr Gardini, who by appointing his situation. After an hour of conversation to place himself in a position with the former chairman of Hercules, the seventh biggest US Gianni Agnelli, the Fiat chairaffairs to others, this week flatly rejected the criteria set by Wall

Street.
When pressed for an explanawhen present for an expansi-tion of a controversial Ferruzzi-Montedison share deal which has come under heavy fire in Italy because of its alleged lack of the debt-laden Montedison. an Italian operation on the Ital-"It's my first day of school," ian market." The small investors, declared Mr Gardini, could "take

it or leave it." That approach, says a resolute he is well aware that Montedison tors, which are represented by Montedison's Himont and Erba-mont subsidiaries, both of them quoted on the New York Stock

Mr Glacco comes with a solid reputation in the US chemicals business - he founded Himont in 1963 as a joint venture between Hercules and Montedison. But halian analysts wonder how he will fare at the helm of a company which is as well known for its political intrigues as for its products.

Mr Glacco says he is a profes-sional and is not going to worry about politics. "I don't know any other way to play but to worry about our small stockholders."

Alexander Giacco: facing an incongruous situation

way up the corporate ladder to work, says Mr Giacco, Montadiachieve his present affluence, son will be reduced to polymers consisting of five houses in Dela-ware, Florida and Pennsylvania posites, pharmaceuticals and

The new Montedison chief says he wants Montedison to "go global." At present 60 per cent of group revenues come from Italy. Mr Giacco's strategy consists of two main goals. The first is to "concentrate" the value-added polymers and composites manuturing divisions of the group and to maximise their return on capital, while doing the same with Montedison's pharmaceuticals and biotechnology holdings. The second is to sell non-strategic assets in order to reach Mr Gardini's target of halving Mon-tedison debt to IA,000bn (\$3.2bn)

As for asset disposals. M Giacco suggests that the Monte fibre artificial fibres subsidiary could be among the first. He also traditional base chemicals business, either in a deal with the Enichem state chemicals group or by selling to a foreign com-pany. But he will not be rushed. "I sold 22 businesses when I was at Hercules. There is a time to sell and a time not to. As long as you're not bleeding, you can

hang on."

This, however, is another incongruity. Given the description of the descriptio desire to reduce debts drastically, Mr Giacco may not have that

much time.
All things considered, the says the American. There is only one problem with this logic. Mr Giacco is now at the court of Raul Gardini, who is no small stockholder.

"Credibility is a very important thing to me," says Mr Giacco, who was born in southern Italy's calabria region, but whose fam
"Calabria region, but whose fam
"I always say that restructure ing a company is the simplest acromany is the simplest acromany is the simplest arrival of an American chief part. Then you have to get the growth potential." says Mr Giacco. "This is why I'm here. Giacco. This is why I'm here. Giacco. "This is why I'm here. Giacco. This is why I'm here. G

#### Krupp warns on profits as

sales slide

KRUPP, THE West German steel and engineering group, has announced a sharp reduction in sales during 1987 — down to DM14.lbn (\$8.8bn) from DM15.8bn and has warned that it will report lower profits for the year. Electronics was the one bright sector increasing sales by 15 per cent to DM774m. Mechanical engineering was down 10 per cent, plantmaking 17 per cent, the troubled steel sector - where

big political row over the closure of its Rheinhausen works down 7 per cent, and trading down 12 per cent. Orders received during 198 were also down on the previous year although less sharply than sales. The order figure was

Krupp has been at the centre of a

DM14.7bn compared with DM15.4bn. The order picture for the cur rent year looks slightly more optimistic. At the end of December 1987 orders in hand stood at DM9.5bn, an increase of 5 per cent on last year.

#### **Bayer improves** despite effects of lower dollar

By David Goodhart in Bonn

BAYER, THE first of the big West German chemical compa-nies to release its annual results, has announced a 3 per cent drop in group turnover to DM37.1bn (\$2.2bn), largely due to the fall in

the dollar.
However, the group stressed sales were 3 per cent up in vol-ume terms and pre-tax income was 8 per cent ahead at DM3.1bn. The dividend will remain at DM10 a share.

Western Europe accounted for DM21.5bn of sales and the US DM6.1bn - a drop of 11 per cent on translation, but an increase of 10.8 per cent in local currency.

The company was moderately optimistic about 1988. It said: "All the figures indicate that the economies of the Federal Republic and most other leading industrial countries will continue along a path of moderate growth." In view of the sales to date and

the incoming orders the company expects to be able to at least maintain the high level of pro-duction achieved in 1987.

Both were con-sidered to be aggressively priced, with the EiB Eurobond indicated in the grey market at 1%, just inside its fees, and the bond war-rant apparently not indicated for lack of interest.

#### Changing rules

There are several reasons why whelmingly dominated the new issues market, has lost its stranposed so that margins can be glehold in the past couple of

ears. First, the rules of the game have changed. At the beginning of 1986, The Netherlands' capital markets were dramatically liberalised to allow new kinds of financial instruments, quicker launch periods, and more freeforeign banks.

Paris, Morgan Guaranty and Yamaichi, among others, started

Another factor has been the on a par. Foreign buyers have snapped up guilder paper, fuel-ling an attractive climate. Many of the foreigners are believed to have been switching out of D-Mark and Swiss paper and into

guilder bonds.

The promising outlook has encouraged corporate borrowers, which have traditionally played second fiddle to official borrowers, especially the Dutch Govern-ment itself. Blue chip names such as Unilever, Norsk Hydro and Akzo have tapped the market in recent weeks.

Not surprisingly players outside the klaverblad have been emboldened. Last month, CSFB lead-managed a F1 250m issue of Eurobonds for Austria that were listed on the Luxembourg stock. exchange instead of in Amster-Bond dealing in large blocks dam, initially prompting a boy- under question.

#### France to clamp down on fraud in markets

By George Graham in Parla

FRENCH stockbrokers and financial intermediaries are to be compelled to introduce timestamping of all orders in an attempt to clamp down on fraud in the Paris markets. Compulsory timestamping is the principal recommendation of an official commission on

financial market ethics, chaired by Mr Gilles Brac de la Perrière, chairman of Banque Pallas, set up a year ago by the Commission des Opérations de Bourse (COB), the stock mar-

ket watchdog. The commission has also oposed a broad set of guide-ies, the aim of which is to ensure that clients are not damaged by their financial intermediaries' acting at the same time in different and incompatible capacities, as brokers, commercial bankers and market makers.

The report urges clearly separated accounting procedures for the different functions carried out in the same company, detailed agreements defining the relationship between client and intermediary, and constraints on the personal deal-ings of stockbrokers.

Fund management activities must be kept independent from the remainder of a stockbroking firm's dealings, the report insists, and fund managers must not have their pay packets linked to any form of profit measurement other than their performance in management of the climater of the climater than their performance.

ing their clients' funds.
Officials hope companies
will introduce their own internal rules over the next year, with the possibility of subse-quently creating a minimum code of conduct to apply to all intermediaries, but they expect the most immediate and visi-ble results to come from the enforcement of systematic timestamping of orders. Mr Brac de la Perrière said:

"If we had to retain only a single rule, it would be times-tamping. Had these procedures been in place, some of the financial scandals which have recently hit the headlines might perhaps not have hap-

Affairs involving Cogema, Affairs involving Cogema, the nuclear fuels company which last year announced sizeable losses from its treasury operations on the financial futures market, and Baudoin, the stockhroking firm suspended this month from dealing by the stock exchange authorities, have highlighted the lack of controls in some areas of the Paris financial markets.

#### Consortium takes over EAB loans

THE EUROPEAN bank consor tium which owns European American Bank (EAB) has taken over potentially risky losns totalling some \$850m in preparation for selling the ven-ture, Reuter reports from

Brussels.
Mr Paul Emmanuel Janssen. nanaging director of Générale managing director of Generale de Banque, said after an extraordinary meeting of the bank's shareholders: "Now we can sell the bank clean." EAB, based in Long Island, is jointly owned by Générale de Banque, Deutsche Bank, Société Générale of France, Midland Bank, Amsterdam.

Midland Bank, Amsterdam-Rotterdam Bank and Creditanstalt-Bankverein. Mr Janssen said, however, that the consortium was not

involved in any negotiations to sell European American Bank. He said the bank's potentially bad loans, mostly to Latin American borrowers, had been taken over by EAB Holding Corporation, which is owned in turn by the European con-sortium. Générale de Banque has a 23.2 per cent stake in

Générale de Banque had Generate de Banque nad already made provisions against 25 per cent of its share of the risky loans and did not plan to make further provisions until EAB had been sold. Générale hoped its profit from the sale would enable it to limit provisions to 50 per cent of the value of the loans.

"We're not in a horry to sell." "We're not in a hurry to sell, hut if there is really a buyer, he can approach us any time," Mr Janssen said. Previous negotiations had been broken off last September, he said, declining to name the inter-

ested party.

He said RAB had turned in a net loss of about \$100m last year against a net profit of \$21m in 1986, after making loan provisions of about \$120m. These had wiped out a trading profit of \$21m.

#### Brazilian loans

THE \$5.8bn in new loans agreed between Brazil and its creditor banks carry an interest rate of 13 percentage points over money market rates, not 1 percentage point as stated in

### Norway brings Euroyen sector back to life

and partly to sensible pricing.

The five-year 9% per cent of a new domestic issue for North bond, priced at 101%, gave an initial yield spread of 50 basis the dollar, affected by the interest rates fears that dogged the US

Treasory bond market.

Dealers said the only five partly to sensible pricing.

The five-year 9% per cent of a new domestic issue for North Rhine-Westphalia are expected initial yield spread of 50 basis points over Canadian government bonds. Dealers said an outstanding Roll Garage and partly to sensible pricing.

The five-year 9% per cent of a new domestic issue for North Rhine-Westphalia are expected initial yield spread of 50 basis points over Canadian government bonds. Dealers said an outstanding Roll Garage and partly to sensible pricing.

The five-year 9% per cent of a new domestic issue for North Rhine-Westphalia are expected initial yield spread of 50 basis points over Canadian government bonds. units was continuing.

The flotation proceeds ellows the company to repay the debt incurred organising the boyout.

#### Stoddard diversifies with £17m **Sekers buy**

Studdard Holdings, the carpet manufacturer, plans to diversify into the wider field of furnishings by acquiring Sek-ers International, which makes expensive furnishing and apparel fabrics, for £17m.

Both companies are chaired by Mr Gordon Kay who will become chairman and chief executive of the new group, to be called Stoddard Sekers International. He will have a small shareholding — of about 2 per cent — in the group. Stoddard was advised by Char-

Stoddard Sekers will be capi-talised at about £44m and will employ 1500 people.

The two companies forecast combined pre-tax profits of 25.2m on turnover of 259m in

25.2m on turnover of £39m in the year to March 31. Stoddard, like many other British carpet companies, lurched into losses in the recession of the late 1970s. A new management team arrived in 1863 and has since stered the company to recovery.

in 1988 and has since steered the company to recovery.

Mr Maurice Alberge, finance director, said that "having emerged from the dark" Stod-dard was eager to broaden the base of its business.

The merger with Sekera, which has an overseas net-work, should help its plans to move into the European carpet market. Similarly it offers an opportunity to develop co-ordi-nated ranges of carpets and furnishings.

Solvers also encountered problems in the recession. It has recovered by building up exports but its US sales have been affected in the past year by the decline of the dollar. It recently diversified into lux-ary goods retailing.
Stoddard plans to integrate the design and marketing activities of the two compa-

It is also eager to expand further through acquisition. Mr Alberge said it was consid-

ering moving into carpet man-ufacturing in Europe, as well as acquisitions in Sekers' established fields. Allied Textile, the wool tex-tile concern, has increased its holding in Hugh Mackay, the

### Rolls-Royce lifts profit 30% but fails to impress market

manufacturer, produced a record pre-tax profit of £156m in 1987 its first since privatisation - up 30 per cent on the previous year's

Sir Francis Tombs, chairman, said this result stemmed from record turnover, up 14.3 per cent from £1.5bn to nearly £2.06bn. The operating profit was up 27 per cent from £278m to £347m. Sir Francis said these results had been achieved despite a big increase of 41.7 per cent to £187m in company-funded research and development spending (there was no Government launching aid

during the year).

This had been necessary to enable Rolls-Royce to meet tougher competition in world markets, especially in civil The increase in R and D was

largely due to work on the V-2500 engine being developed by the five-nation, seven-company, International Aero Engines group in which Rolls-Royce has a 30 per cent stake, as well as to contin-ued development of the RB-211-Six Francis felt the results showed "how firmly the company is now based in the international sked if the company was yet markets it serves. We have been able to face sharply increased net

Sir Francis Tombs - big increase in R and D spending

new sales opportunities which are appearing around the world." Sir Francis also said that in order to remain competitive in future, the company was examining a wide range of initiatives.
These included keeping a contimed watch on staff numbers. currently standing at 36,000, with the possibility of small reduc-Asked if the company was yet ready to launch its next big ver-sion of the RB-211-524 engine, the

Rolls-Royce is recommending a final dividend of 3.5p per share, bringing the total for 1987 to 5.25p as indicated in the privatisation prospectus, and covered 3.2 times.

#### comment

Rolls- Royce's first results as a public company failed to prevent the shares from drifting down with the market to 120p, and it is not hard to see why. The figures themselves contained few sur-prises and the future promises more of the same. Operating profits for the next year or two look flattish, and while a £2.8bn order book will mean further increases in turnover, the company is currently spending enough on R and D to take care of the extra. If the pre-tax figure rises this year to say £170m, it will be mainly due to a large swing from interest payable to interest receivable. Longer term, Rolls-Royce must rebuild its order book, a task that is not going to be made any easter by the strength of the pound. While hedging largely protected the company from currency effects last year, at present exchange rates it will soon start showing signs of discomfort.
Although the shares seem well protected by a yield of more than 6 per cent and a p/e of less than anie to nece sharply increased net son of the RB-211-524 engine, the expenditure on research and a full deliver development and still deliver above, for such sircraft as the healthily increased profits.

Although A330 and the McDonnell short, not enough to strengthen to competitive engines gives us an although discussions with air-excellent opportunity to consolidate our existing customer base continued.

To model of 65,000 lbs thrust and 7, it is hard to see them moving up much until there is good news about one of the new engines. In short, not enough to strengthen recent complaints to the EC by the forced foreign sellers — especially not in markets like yesterday's.

It is believed the Paul Ramsey group decided to pull out of radio in the UK to concentrate on the development of its television interests in Australia.

#### Cayzer family shuffles its deck of company interests

THE CAYZER family, former controlling shareholders in Britchish & Commonwealth Holdings, yesterday shuffled the cards in two other quoted companies in which they hold significant stakes.

Sterding Industries bought combustion subsidiary of Caledonia Sterling, Cayzer Trust combustion subsidiary of Caledonia Investments, and Cayzer Trust companies control a total of 45.5 its 68 per cent interest in Sterling or cant of Caledonia abares.

Staries.

Sterling Industries hought
Usquhart Engineering, industrial
combustion subsidiary of Cale
donia Investments, and Cayeer
Trust said it was willing to see
its 68 per cent interest in Sterling
the companies control a total of 4

Caledonia share to the control of Caledonia share to the control of the control of Caledonia share to the control of the control o diluted in order to finance fur-ther expansion in specialist engi-neering.

Caledonia also plans to buy in \$1.25m in preference shares as part of a streamlining of its capi-

neering.
Caledonia, meanwhile, said it would pay a final dividend of 4.5p (3.3p) for the year to March 31, to make a total of 7p (5.5p). The increase reflects the higher yield Caledonia is receiving on invest-ments after reducing its stake in B&C Holdings last year.

Urquhart made pre-tax profits of 2571,000 on sales of \$4.7m in 1987. Sterling's existing interest ably in April. The Leeds-based in engineering is centred on company operates nine auction hydraulic counlings, cylinders centres around the country and

and valves.

In return for Urquhart, Sterling is to issue to Caledonia are the Leeds office of Rensburg.

#### **Desoutter Bros** rises 21% to finish at £6m

precision mechanical engineer, amounced pre-tax profits for 1987 up 21 per cent at £5.98m, against £4.95m last time.

Mr R.C. Descriter, chairman, said that group sales had shown an 8 per cent improvement over 1986, but that due to year-end currency fluctuations, turnover rose by only 8 per cent from £89,19m to £40,33m. Earnings advanced from £5 in to 30 in. from 25.1p to 30.1p.

A final dividend of 6.4p nake a total for the year of 9.1p (7.7p).

Mr Descutter said that demand for the company's products was currently at record levels but that the increased value of starling would affect margins and reduce potential for profit growth in 1988.

Net interest payable dropped to £154,099 (£339,000) while tax was £3.21m (£1.79m).

### TV-am shrugs off dispute and grows 50% to £13.08m

increased profits by 50 per cent to £13.08m for the year to January 31 1988. The pre-tax advance was made on turnover up 31 per cent

at 554.74m. Farnings per share rose to 15.1p from 13.1p.

"We regard our performance for the year as one of which we can all be justifiably proud," said

Mr. Isp. Turking who took over as Mr Ian Irvine, who took over as chairman last month after Mr Timothy Aitken resigned following revelations that Saudi interests had controlled a 15 per cent stake in the company since last

"The latter part of the year was significantly influenced by the ACIT dispute," Mr Irvine said. Last mouth TV-am dismissed 232 ACTT technicians for refusing to agree to changes in working practices. The technicians were locked out last November and members of the management have been working in their place

The station reduced its 3% hours a day live programming to 2% and hought in a lot of material, but despite these costs, the cut in salary costs meant the company saved a substantial

amount of money.

Net advertising revenue increased by 15.2 per cent to 254,500, giving TV-am a 3.9 per cent share of the total network ue, up from 3.4 per cent the previous year.

TV-am, the beleaguered break- towards women, we were pleased fast television station, has to see an increase in the male viewership between the 6am and

The company is to boost its news and current affairs output by enlarging regional studies and opening international bureaux

The Exchequer levy was 68.43m (66.57m). The tax charge was £3.19m, compared with last year's £150,000 when the company was utilising tax losses. A final dividend of 3.5p was recommended, making a total for the year of 4.5p (2.6p).

During the dispute the company's revenue did not suffer, the chairman said. In fact the company probably benefitted to the tune of about film. Despite the repeats, TV-am's 15.2 per cent growth in advertising revenue beat the network's 12 per cent, reflecting increased audience fig-ures which are continuing to edge up. The station is having some success in its bid to attract more male viewers but is keen to draw in more and so widen its advertising portfolio. The man-agement have this week taken themselves back to their offices from the studio floor - apart from managing director Bruce Gyngell who is recovering in hospital after a heart attack - and feel they have put the strike behind them. The company's £18m cash is comforting in the light of ten-"Our average andience is now dering. The shares closed 3p off 15.7m a week - up 1m on last last night at 135p. At about £16m year," said Mr Irvine. "Although the audience tends to be biased is 8.

### MOVING AHEAD LL FRON

CHAIRMAN'S STATEMENT

I am pleased to present our first set of results as a company listed on both the London and Amsterdam Stock Exchanges.

Total income for the six months to 31st January 1988 was £17.110 million compared with £15.523 million for the same period last year, a 10% increase. Profits before tax were £3.813 million compared with £2.862 million for the same period last year, a 33% increase. Earnings per share, calculated on the basis set out in Note 3 to the consolidated profit and loss account, rose from 4.8p to 6.5p, a 35%increase.

Our first dividend will be a final dividend to be paid in November 1988 in respect of the year to 31st July 1988. The Directors expect this dividend to be not less than 2.8 pence per ordinary share.

Our interim results reflect the continuing, strong performance of the business. The first half of the financial year saw a further increase in our utilisation levels and in business activity generally.

We are continuing our capital expenditure plans which focus on increasing the overall size of the trailer fleet and also the proportion of "premium", or high specification, units in order to reflect customer preference and changes in legislation. The benefits of this expenditure can already be seen in our interim results.

We have also continued to examine opportunities for

expanding the branch network, particularly in France, Germany and into Spain, in order for us to be able to take full advantage of the considerable potential in the trailer rental market in Europe.

Looking ahead, the proceeds from our flotation last month will allow us to sustain and enhance our financial performance. The new money raised has repaid the debt incurred by the company in organising the management buy-out and so sets the basis for us to enhance further our expenditure on the trailer fleet and the branch network.

A large number of our employees bought shares in the company at the time of the flotation and we have also introduced share option schemes which cover all our employees. I know these developments will encourage a still closer identification between T.I.P. and its employees.

The Board has been strengthened with the appointment last October of Jim Davis as a non-executive Director. Jim Davis has a wide experience of the transport and shipping industries throughout Europe and I am pleased to welcome him to the Board.

T.I.P. is now very strongly positioned to take advantage of the potential in the trailer rental market and I believe that the prospects for substantial further growth in our business are strong.

Jim Cleary, Chairman 24th March 1988

INTERIM RESULTS						
Consolidated profit and loss account	6 months ended 31.L88 (unaudited) Notes £000		6 months ended 31.1.87 (unaudited) £000	year ended 31.7.87 £000

Earnings per share	74.3¢	46,5¢		

as an exceptional year for the Company. A waique blend of factors working in the airfine's favour all cause aggebra to the another record result. This reflected strong external acts giving rise to increased traffic demand, steady fuel unidences giving rise to increased institute containt, seasoy tool prices and currency movements which improved yields. Combined with the additional profit entaing capability of the 17.7 per cess. increase in capacity flows, these factors increased the profit attributable to shareholders by 71.4 per cess. over the 1986 results amminume to statements by 11.4 per cent. over the 1900 result to HKS2\_115.8 million. The results were affected particularly by an nonseally high rate of growth in sweral of the Company's markets, specifically those of Japun, Thiwan and Europe. Unit costs were maintained at 1986 levels.

ds: An inscrim dividend of 7.50 per state the Dividender: An interim dividend of 7.5c per share absorbing HUS24.8 million was paid to shareholders on 30th September 1987. The directors will recommend to shareholders at the amous general meeting on 25th May 1988 the payment of a final dividend of 20.5c per share absorbing HUSS87.2 million, payable on 31st May 1988 to shareholders registered on 27th May 1988. The share register will be closed from 16th May to 27th May 1988, both dates inclusive. The total dividend for 1987 would thus amount to 28.0° per share, as against 20.0° per shape paid in respect of 1986.

Operations: Two new Boeing 747-300 extended upper deck alreads were acquired asgether with a Boeing 747-200 freighter. Three TriStars previously held under operating letters were Three TriStars previously held under operating accounted under famance leaving arrangements. A seath TriStar was also acquired bringing the total number of sixtyast operated by the Company up to twenty-five. The high level of growth of both passenger and cargo volumes which first became evident towards the end of the previous year was sustained throughout the whole of 1987 and facilitated the deployment of these additional ninerall at high load factors. The revenue load factor improved to

73.6 per cent. from 70.2 per cent. in 1986. Financing: Net borrowings at 31st December 1987 amounted to 1985;22.4 million compared with HKSS,2714 million a year earlier. Borrowings increased mainly as a result of additional untealised exchange differences amounting to HKS2,344.1 million, caused by the weakening during 1987 of the Hong Kong dollar against the currencies in which most of the borrowings are denominated; however, this was largely offset by a high level of each received from airline operations together with receipts on the issue of new shurst during the way. cash received from airline operations to the issue of new shares during the year.

It is the Company's policy to raise long-term fatance denominates in curvencies in which it has substantial positive cash flows. This in convenients in which it was instantial positive care looke. I me done to work any med to purchase foreign exchange in order to sente the resulting repayment obligations. It also ensures that exchange fluctuations affecting the value of such obligations in those currencies are effectively hedged by corresponding, but offsening, fluctuations affecting earnings. Forecast surplus foreign currency earnings exceed the relevant interest and long ests in any year and heace a hedged positio

pects: 1987 was a year in which most of the principal factors which contribute to the profitability of the Company were favourable including good growth in passenger and eargy volumes, exchange rates and fuel prices; it will be a difficult year to follow. er the new year has started well and there is no sign that ninties created by recent fluctuations in the financial members have affected the air travel maybers to any significant degree. Nevertheless, there is some reason to be cantious about 1968. In anticipation though of further long term growth, an order was placed during the year for a shoth Booing '47-300 passenger durant for delivery in May 1988 and subsequent to the year end two further TriStar aircraft were acquired to meet region rises demand. There are two new other long ration 747-400 margus demand. I have are two new unto long range AP-000 peasenger aircraft due for delivery in the first baif of 1989. Options are also available to the Company for seven more such aircraft for delivery between 1989 and 1991. The Company continues to regard the forme with confidence.

Ehraings per share are calculated by redresses to the profit estimated to shareholders. For the year ended 3hs December 1997, the surjected areans marked of 2.846,829,300 shares in issue during the period has been used (1986; 2.652,325,500 slaues). The manual report for 1987 including the chairman's vanisment and the audited accounts for the year ended 31 st December 1987 will be sent to shareholders on 3rd May 1968.

Hoeg Koog, 21st March 1988

The Swire Group

#### 1987 Results Operating profits up 27% to £347 million.

Chairman, Sir Francis Tombs, said, "The results show how firmly based Rolls-Royce now is in the international markets which it serves. We have been able to face sharply increased net expenditure on research and development and still deliver healthily increased profits. Our order book is strong and our wide stable of competitive engines gives us an excellent opportunity to consolidate our existing customer base and secure some of the attractive new sales opportunities which are appearing around the world."

The Directors recommend a final dividend of 3.5p bringing the total for 1987 to 5.25p. The dividend is as indicated in the prospectus and is covered 3.2 times.

#### **UK COMPANY NEWS**

## Croda ahead 17% and good start this year

h make

tions

Croda International, chemipany, yesterday announced a 17 per cent increase in pre-tax profper cent increase in pre-tax prof-its and a 24 per cent rise in earn-ings per share.

Mr Mike Cannon, chairman said 1988 had started well. The company had not experienced

any downturn.

In the year to December 27,
Croda increased pre-tax profits
from £27.14m to £31.8m on sales
of £339.47m (£342.73m). Earnings rose proportionately more, from 13.6p to 16.82p, because of a reduced tax charge.

Sales volumes improved and the reduced turnover resulted

from lower selling prices, adverse currency translation and "judi-

Cous business pruning."
Gearing rose from 5.8 per cent
to 9.1 per cent, but would have
been about 4.1 per cent had the

company not bought Hilko Hold- tion costs in 1966.
ing, a Dutch cosmetics group.

Cosmetics and toiletries profits
Mr. Derek Mather, vice chair, were 22.58m (£2m), while the surman, said Croda was holding face coatings contribution was up acquisition talks with a number 68 per cent to £5.1m.

of small privately-owned companies. Two acquisition announces makes a total payout of 9p (8p).

ments are likely within the next couple of months.

Of the five divisions in the group, only food reported a profits downturn, with the \$2.7m of in line with expectations, the its flownturn, with the £2.7m of in line with expectations, the 1935 falling to £1.31m. Although lower tax charge led to a windfall food services had a good year, the in the earnings growth. With the honey operations suffered from ACP clawbacks mountain at £7m nearket oversupply. Sunland, the — short £2.2m was used last year 98 honey importer, saw profits of — a similar tax charge of about £400,000 turn into a similar 31 per cent can be expected in amount of losses.

## **Exchange rates hit** Spirax-Sarco profits

Spirax-Sarco Engineering, total of 6.4p for the year (5.7p). fluid control equipment manufacturer, saw pre-tax profits rise by 12 per cent from £16.9m to £18.9m The company also announced that current chairman, Mr Jim 1000

1986.
Trading profit was £17.9m, representing a margin of 18.2 per cent (17.2 per cent). The company said currency ranslations had an adverse effect

on profits of around £500,000. Mr Simon Harris, finance director, said group turnover increased by 4.3 per cent to £98.8m (£94.7m). Without the effect of currency translations, this increase would have been more than 10 per cent. He added that order levels in

the early 1988 were higher in real terms than last year and that the group's January acquisition, West German Hygromatik, was performing well.

The company has a strong belance sheet with net positive cash flow of \$4.8m in 1987 and is open to the possibility of acquiring another company to complement existing operations.

Mr Chris Tappin, chief execu-

tive, said the steam speciality market in the UK picked up in the second half of 1987, as did the European market, although diffi-cult trading conditions in Belgium, Spain and Austria adversely affected results of the group's operations in those coun-

The board recommended a final dividend of 4.7p making a

(145p).
The company also announced that current chairman, Mr Jim Parsons, will retire in May. On his retirement Mr Tappin, will combine the position of chairma with his present role.

comment

The markets in which Spirax Sarco operates are not quitefinite but they are mature and the company has rightly recognised the need to be a world player. The subsidiaries are usually trans lated into sterling at average rates, a practice which has ofte prompted investors to take the stock. However, this may b me suck. However, this may be misleading as many of the operations abroad are manufacturing facilities and therefore unlikely to be hard hit on the trading line by exchange rate fluctuations. The current management is methodically exercises. ment is methodically carryin out a 5 year plan and the bus generative. A few acquisitions, along the lines of Hygromatik, might be expected this year. Spi-rax-Sarco has always been a sure and steady stock and has prove resilient to uncertain market con ditions. Current forecasts for £20m give a prospective multiple around 10 which appears slightly

♠New product lines, new markets and greater capital investment should produce further growth 9 William Brake, Chairman

#### Higher wheat crop forecast for 1988-89

By David Blackwell

WORLD PRODUCTION of wheat for 1988-89 is set to rise to 525m tonnes, according to preliminary projections by the International Wheat Council.

This is well short of the record 535m tonnes set in 1986-87, but much higher than the 508m tonnes for 1987-88.

The 1987-88 harvest was 31m tonnes below estimated consumption of 539m tonnes, according to the IWC's latest monthly report. The smaller harvest is expected to lead to a 21m tonne decline in the stocks of the five major exporters (Argentina, Australia, Canada, the US and the EC) at the end of this year to 61m tonnes - the lowest level since

The low level of stocks, coming after five years of steady accumu-lation, could mean that in the coming year the international market could be significantly influenced by the size of the world harvest for the first time in several years, says the report.

"A crop below the level of consumption could result in a draw-down of stocks to levels that could push up prices and encourage the removal of limitations on output in the US, and stimulate production in other major exporting countries," says the IWC.

"Alternatively it is not imposs hle that a large world harvest could give rise to some modest replenishment of stocks.

#### FAO calls for decisive action on locust plague

By John Wyles in Rome

THE UN's Food and Agriculture Organisation yesterday called for "swift and decisive action" to deal with a plague of locusts which threatens to cause a major food crisis in the Sahel and parts of North Africa.

Mr Edouard Saouma, the director general of FAO, warned yesterday that swarms of locusts had reached the Mediterranean in the last few days after invad-ing Morocco, Algeria, Tunisia

He said there was a risk of a "devastating plague" similar to the one of 30 years ago which took 10 years to conquer. FAO officials believe that the time has come to re-examine the use of certain pesticides, arguing that the plague can only be checked by controlled and supervised spraying of dieldrin all over the infected surface.

## **Excess production could** tarnish silver outlook

A WARNING that looming growth in silver production is casting a shadow over the price of this precious metal has come from the New York-based American Precious Metals Advisors group in its weekly bulletin. Silver production in the non-Socialist world is set to rise from about 325m ounces in 1987 to at

Nearly all of this increase will be bi-product of new gold or base metal mines and therefore will be insensitive to the price and eco-nomics of the silver market itself,

least 390m ounces in 1990, it sug-

"Silver's price could still perform relatively well in the next year or two if precious metals enjoy a strong bull market, if the Americans – who still favour silver – become excited again about hedge media and/or if world business activity continues to improve.

"However, the next bear mar-ket could be particularly severe for silver because little of the new production will be shut down at low silver prices," APMA CONCERN OVER unrest in South Africa is continuing to push platinum prices higher. writes our commodities staff. The London bullion market price, which this week moved above \$500 a troy ounce for the first time since the middle of January, gained another \$6.25 yesterday to \$517.75 an ounce. Unofficial strikes by miners in South Africa, where about 80 per cent of the world's plati-

mine (5m troy ounces of silver in 1990 and ultimately expected to produce 8m ounces); Consoli-dated TVX's new Chilean mine (more that 8m ounces by 1991); FMC Gold's Paradise Peak mine (4m to 5m ounces); Placer Dome's Misima and Porgera projects in Papua-New Guinea (about 7m

## Brazil tackles gold smuggling

zil yesterday took an important step aimed at ending Brazil's time-honoured gold smuggling

Last year smugglers are believe year smuggiers are believed to have disposed of a staggering 65 per cent of Brazil's gold output, estimated at about 100 tonnes.

The Brazilian Central Bank has now decreed that any financial institution can buy gold directly from from the independent prospectors, known as Garimpeiros, in the hope that banks and brokerage houses will displace the smugglers by paying the market price.

AFTER MONTHS of acrimonious the Central Bank levied a 2.5 per 3.8 tonnes debate, the Central Bank of Bra-cent tax and often used to fix the Nonethe national gold price below the

international price nellow the international price.
Naturally, the Garimpeiros preferred to sell their gold to smngglers, who ignore the Central Bank's gold price and do not pay taxes. The smugglers fly the gold in light aircraft to Rio de Janeiro or Sao Paulo and then send it to

attempted to curb smuggling by cutting taxes by two-thirds and

Nonetheless, smugging continued, mainly because the Garin-peiros suspected the government buyers of being double agents for the tax authorities. Also, there are not enough government buy-ers to cover all of the Amazon's 2,000 gold producing sites.

Although the government has learned to live with them officials

Alcasa last week signed an agreement for con-struction of a 180,000-tonnes-ayear smelter in partnership with Austria Metall AG and Pechiney of France, and earlier this year it was learned that a Venezuelan government agency, the Corpora-cion Venezolana de Guayana, will build a 120,000-tonnes a year smelter with the Aluminum Com-

Sural, a Venenezuelan partner.

#### Nickel price touches £20,000 a tonne

NICKEL'S SERMINGLY unstop pable rise continued yesterday and the cash price set yet another record during official London Metal Exchange dealings in the morning - \$20,000 a tonne

That was \$200 a tonne or 9 cents a lb above the peak reached on Wednesday. However, moderately active two-way dealings developed dur-ing the afternoon LME rings and at the close nickel was \$19,950 a

at the close mase; was \$13,500 a tonne, up \$500.

Metal Bulletin magazine reported yesterday that ice in the North Sea had delayed the arrival of Soviet ships but one vessel, believed to have 3,000 tonnes of nickel on board, was due to arrive in Europe by the due to arrive in Europe by the

and of this month. Traders suggested, though, that the metal is likely to go straight to consumers and do nothing to improve the level of the LME's nickel stocks which are widely expected to show another fall this week from the dangerously low level of 1,938

The nickel price is almost certain to continue to rise until the dispute which has held up ship-ments by Falconbridge from the Dominican Republic is ended or more metal arrives from the Soviet Union, traders added. However, most assume that the Soviet Union would already have shown a keemess to sell at the current record prices if it had any nickel readily available.

#### UK fish farming export sales 'disappointing' By David Blackwell

THE BRITISH fish farming indus

try, already growing fast on the domestic front, has substantial room for expansion into overseas markets, according to a report by Aberdeen University Marine

The report, commissioned by the Department of Trade and Industry as part of its "Resources from the Sea" programme, describes as "disappointing" the industry's export penetration of only 1.9 per cent of the potential market. It estimates the world market to be worth just under £2bn a year for the next five

The potential is too great to be ignored, says the report, which believes a 5 per cent share (£95.4m a year for the next five years) is a realistic short-term target which could be achieved through better marketing of existing capabilities. In the longer term, 10 per cent could be reached. pany of America (Alcoa) and

#### LONDON MARKETS

ZINC PRICES continued their recent rise on the LME vesterday afternoon after a shaky start in morning trading, when attempts to break above previous highs lalled. Three-month metal advanced £4.2 toone to close at £552.50, equivalent to above £550 a toppe could signal further near-term gains. Aluminium prices manintained the firmer trend of the morning, closing just below the day's highs after some profit-taking. Copper prices continued to advance on chart inspired buying and some stop-loss afternoon was triggered by the Comex May contract breaching 100 cents a lb, traders said. Meanwhile, the Biffex dry cargo freight futures market tumbled sharply. The fall was seen as a healthy shake-out after the recent run-up to record highs, traders said. Cocoa prices rose on short-covering and fresh lative buying.

**MONEY MARKETS London rates steady** 

THERE WAS little change in interest rates on the London 

while one-year money rose to \$20m, and bank balances below \$\%.9\% p.c. from 9\%.9\% p.c. in a target £30m. These outweighed defensive manoeuvre ahead of the trade figures.

The City generally expects an improvement in the February figures, from a record trade deficit UK clearing bank best lending rate

of £1.51n in January and a cur- and prorent account shortfall of £905m. It building is also hoped the year-on-year inflation rate will ease slightly from January's level of 3.3 p.c.

The Bank of England forecast a factors money market shortage of £850m, and provided total assistance of

An early round of help was funds, the content of th authorities bought £23m bank der, am

**BUSINESS SCHOOL** 

Registered Representatives and

We're better qualified to help

If you're serious about your career in the securities industry, you'll appreciate the wealth of expertise that's gone into this evening course — the only course of its kind officially authorised by The Stock Exchange in conjunction with the

Securities Association.

For two evenings a week, starting April 26 for 11 weeks, our team of lecturers — many of them important figures in the securities industry — will prepare you for those crucial exams in a course that's strong on practical involvement.

And in return for your commitment and effort, you'll acquire knowledge that will be of value to you way beyond the immediate goal of pessing your exams.

Applications must be completed by April 11, so for full course details and a registration form, call Donna Lee on 01-920 0111, extension 2288, or Jackie Macksacc on 01-588 2355, extension 28476.

Are You On The Right Wavelength? **WAVE ANALYSIS** Latest issue now out projecting stock indices, currencies, interest rates, commodities and shipping.

For further information please call/write to: A.P. Black Ltd. 30 Hill St. Landon W1X 7FU 01-629 9011

WORLD VALUE OF THE DOLLAR USE BANK OF AMERICA GLOBAL TRADING ECONOMICS DEPT., LONDON

The table below gives the talest available rate of exchange for the U.S. dollar against various currencles as of Wednesday, Murch 23,1988. The exchange rates listed are middle rates between buying and selling rates as quoted between banks, guless otherwise indicated. All currencies are quoted in fureign currency units per one U.S. dollar except in certain specified areas. All rates quoted are indicative. They are not based on, and are not intended to be used as a basis for, particular transactions. Bank of America NT & SA does not undertake to trade in all listed foreign currencies, and neither Bank of America NT & SA nor the Financial Times assume responsibility for errors.

## Dow slumps as dollar and bond worries grow

#### **Wall Street**

THE UNEASY calm in the equity to trigger the decline in the market finally broke yesterday as equity market. First and forethe dollar slumped overseas and most, equities had not signifiweakness in the bond market cantly reacted to the substantial took its toll, writes Janet Bush in fall in the bond market over the

The Dow Jones Industrial very expensive in comparison Average started falling as soon as with bonds on any of the stanthe market opened, as yields on the bond market surged to their highest levels since late January. Towards lunchtime, as losses in the equity market built up, bonds despite the October share price 8.77 per cent to just above 8.75 the way.

The Dow then stabilised ingly on rising commodity prices, 18, had started to slow down, and around noon at a loss of 40 points as measured by the Commodity the weakness in blue chips was and closed 43.77 points lower at Research Bureau's index, a sharp 2,023.87. Bonds, meanwhile, rise in crude oil prices due to 2,023.87. Bonds, meanwrite, rise in crude on prices due to recovered from an early loss of possible emergency price stabilismore than ½ point to end ation measures by the Organisation trading confined to takeover slightly higher in the long end tion of Petroleum Exporting stocks and the lack of activity in and up to ½ point lower in short.

JUST SIX weeks ago, a black cloud of gloom settled over the

Australian stock market as the

key indicator, the All-Ordinaries index, sank to 1,171, more than 50

per cent below its peak of last

Chartists said this was danger-ously close to the 1,150 level reached on November 11, three

weeks after the October crash,

and some forecast a plunge to 800

This week, the despondency seems to have evaporated. A month and a half of sustained

rises and soaring volumes has put a song in brokers' voices, a dance in their clients' step. The index has risen a remark-

cent, and in value terms have roughly doubled in size. While no one sees the pace of this rise continuing unchecked, few believe it represents a fear-

some bear trap preparing to snatch them back into oblivion.

about the forces at work since the dark days of January and

early February. Investors who

wrote off Australia because a crash-induced recession would

hurt it badly are now returning because the slowdown has not

Behind this view lies the perception that Australia, as a major

commodity producer, has one of the world's most "growth-sensi-

tive" economies. Because growth

in the US, Japan and Europe turned out higher than expected

prior to the crash and has continued stronger than expected since, sentiment has changed.

Australian shares have gained

as prices surged for certain com-modities - wool, nickel and alu-

minium are all at record levels -

and the domestic economy, projected to show 3 per cent GDP growth this year, has expanded

At the same time, foreign insti-

tutional investors who had become overweight in equities

during the five-year bull run

recognise they may have veered too far the other way. As they redress the imbalance, local insti-tutions have stopped selling.

A long string of better-than-ex-

pected interim profits in the cor-porate sector, coupled with some

optimistic comments from man-

agements, reinforced the swing towards optimism, while a

strengthening dollar was a fur-

ther comfort for foreigners.

A revival of takeover activity

has also helped. Early on there

## Sellers emerge amid fears of curbs on margin trading

## Tokyo

BUYING enthusiasm disappeared rapidly in Tokyo yesterday on growing fears that further con-trols would be imposed on margin trading, writes Shigeo Nishi-

walci of Jiji Press. Several recent market leaders. notably large-capital steels and shipbuildings, came under seiling pressure. But some biotechnolo-

gies and stocks that will benefit from private equipment invest-ment firmed. The Nikkei average rose 62 points in early trading, but lost ground gradually to close down 113.95, near the day's lows, at 25,781.28. Turnover shrank from 1.5bn shares on Wednesday to 842m and falls were nearly double gains at 603 against 302, with 154 issues unchanged The index has risen a remark-able 24 per cent in that time – it closed yesterday at 1,450.5, another 23 points higher. Trading the industrial group BTR Nylex volumes are up around 50 per cent, and in value terms have

More recently New Zealand entrepreneur Sir Ron Brierley 154 issues unchanged.

The margin buying balance on the Tokyo, Osaka and Nagoya has joined forces with Mr Kerry Packer, the publishing magnate, to bid A\$825m (US\$612m) for Mr stock exchanges reached Y7,410bn on March 18, up Y200bn Robert Holmes a Court's Bell Resources, while Email has offered A\$380m for BHP's Rheem on a week ago and a record high for the third week, according to figures released on Wednesday.

The news increased the possibil-ity that margin trading controls would be further strengthened. several hundred continue to lan-guish. Equally, some have gained Boving interest was also hit by from special circumstances: this week it is News Corporation, rumours that the Finance Ministry was concerned about a leadtion from a New York firm, and ing brokerage house's massive Western Mining, because an industrial dispute there has purchases of giant-capital steels and shipbuildings.
A further blow came from

boosted the nickel price. The optimism has spread to difnews of a large increase in institutional selling of banks and other stocks before the end of the March closing of books.

With a drop in trading in large-capitals, the ratio of transactions in the 10 most active stocks to total turnover fell from Shares worth A\$257m. up stocks, moving into blue chip industrials and transport and property sectors, and latterly mining stocks, which some ana-

Wednesday's 56.1 per cent to 37.5 per cent. Nippon Steel remained at the top of the active list, but its turnover plummeted to 79m shares – less than one-third Wednesday's level – and its price fell Y8 to Y476. Sumitomo Metal Industries,

Most analysts see the rising market trend as a rally from an oversold position and believe it will run into the second quarter. second with 61.4m shares traded, dipped Y2 to Y394, while Ishika-wajima-Harima Heavy Industries and Tokyo Gas fell Y30 to Y924 and Y20 to Y1,250 respectively.

Buying of high-technology While they also believe it is underplaned firmly enough to avoid a relapse to the lowest post-crash levels, they caution that the recent pace of increase cannot continue indefinitely. stocks decreased again as the yen advanced against the dollar. Mat-sushita Electric Industrial lost On this basis, one analyst ven-tures, the market can be expected to peak by mid-year and then Y50 to Y2,650 and Sony Y100 to Y5,150, while NTT dropped Y40,000 to Y2.4m. give way to a generally uninspir-ing performance.
